

# ICANN | 52

# *Singapore*

8-12 FEBRUARY 2015

# NEWCOMER WELCOME

Janice Douma Lange | ICANN 52 | 8 FEB 2015

# Housekeeping

- Translation headsets in back of room
- Show some love to the Interpreters 😊 say name and country for the record always, speak slowly and clearly in any language
- Phones off and computers mute
- Questions and Interaction encouraged
- Relax

# Goals Of The Day

- Enable fast and effective engagement at 1st meeting
- Help to understand ICANN, its structure, processes and community
- Provide mentorship, guidance, and networking opportunities
- Send you off in a better place than when you arrived!

# Our Day

1

Newcomer  
Experience

2

ICANN and the  
Internet  
Ecosystem

3

ICANN's Multi-  
Stakeholder  
Approach

4

The Work of  
ICANN

5

The Meeting  
Week

6

Staying  
Engaged /  
Sectors at Work

# Am I The Only One ?

- Strange Language
- Closed Doors
- Everybody knows everybody
- How Do I Go About This?

“ICANN cannot become a fortress.  
ICANN must become an oasis, a place  
that people see and come to because it  
works, because it makes sense, because  
it’s efficient”

# How Did the Internet Begin?

# What does ICANN do?

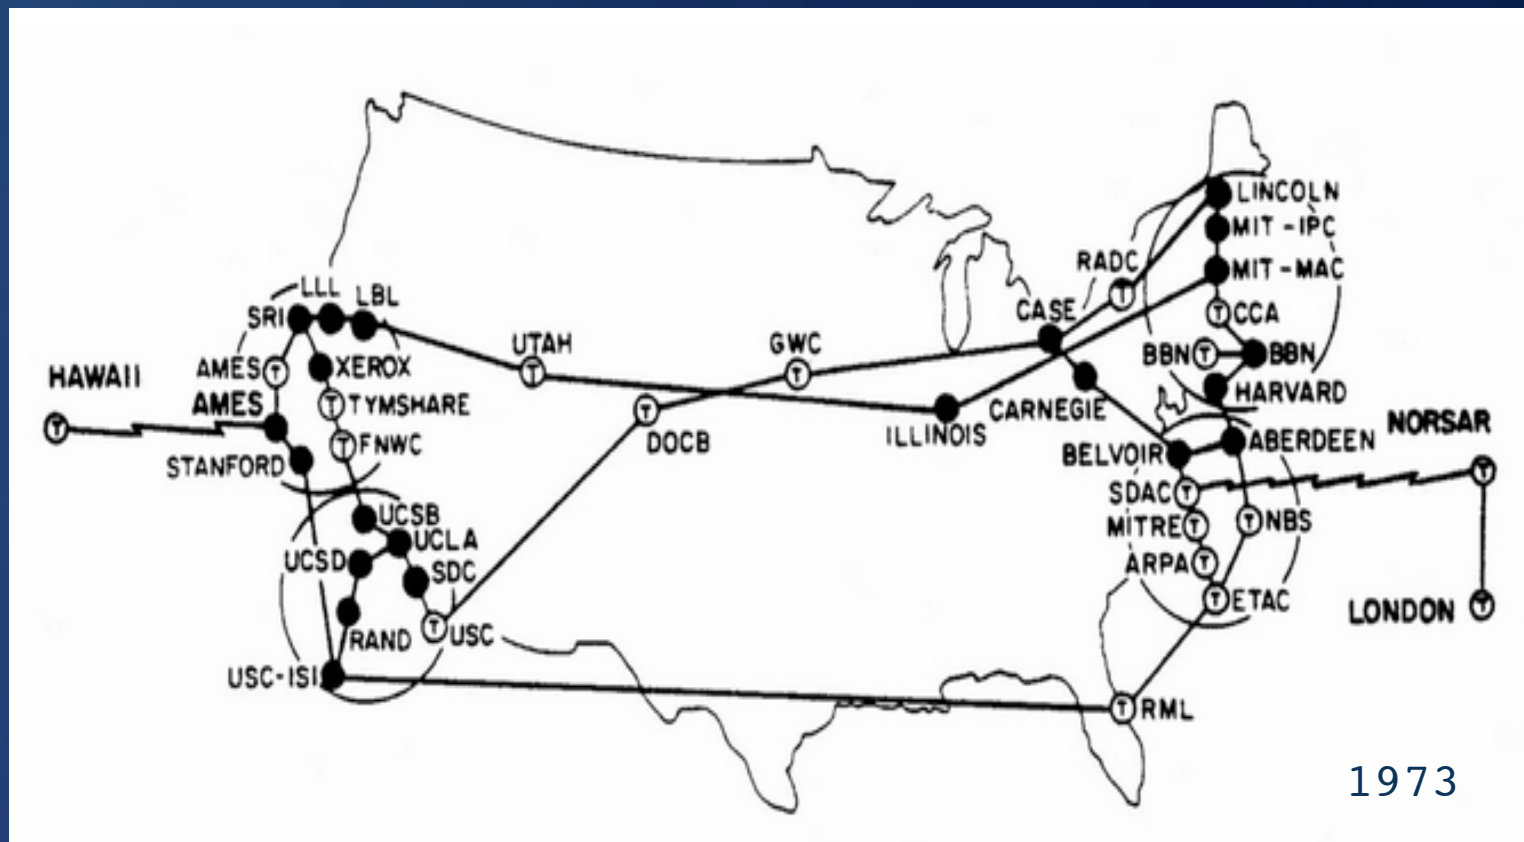

<https://www.youtube.com/watch?v=vd3dH9otdhk> - action=share

# A Brief History of the Internet - Part I

1969

ARPAnet, first network run on packet switching technology, created

1973

# A Brief History of the Internet - Part II

1971

Electronic email introduced by Ray Tomlinson

1974

Transmission Control Protocol/Internet Protocol (TCP/IP) designed

1989

Tim Berners-Lee invents World Wide Web and HTTP

1993

Mosaic Browser released, popularized the WWW

1994

Netscape Navigator, Yahoo directory of websites released

# A Brief History of the Internet - Part III

Source: National Science Foundation

# History of the Internet Part IV

**1995**

**Microsoft launches Internet Explorer browser**

**1996**

**Hotmail, one of the world's first free webmail services, launches**

**1998**

**Google founded**

**1998**

**ICANN incorporated in California**

# History of the Internet Part V

**2001**

**Wikipedia launched**

**2004**

**Mark Zuckerberg launches Facebook in Cambridge, MA**

**2006**

**Twitter launched, first Tweet “just setting up my twitter”**

**2010**

**Instagram founded**

**2012**

**Number of Internet users reaches 2.4 billion**

“The Internet is the  
Greatest Public Gift”

# The Internet Ecosystem

The Internet is successful in large part due to its unique model of development and deployment:

- Open technical standards
- Freely accessible processes for technology and policy development
- Transparent and collaborative governance
- Innovation at “edge”

# Components of Internet Ecosystem

- Organizations, individuals and processes that shape the coordination and management of the global Internet
- Highly interdependent parts which require significant coordination
- ICANN is but one of these organizations
- ICANN is pivotal to naming and addressing

# Many Players in IG Space (1)

## Both Technical and Policy

- Internet Society (ISOC)
- Internet Engineering Task Force (IETF)
- Internet Architecture Board (IAB)
- Internet Assigned Numbers Authority (IANA)
- Regional Internet Registries (RIRs)
- Regional Network Operators Groups (\*nogs)
- W3C

# Many Players in IG Space (2)

## Both Technical and Policy

- International Telecommunication Organisation (ITU)
- World Trade Organization (WTO)
- World Intellectual Property Organisation (WIPO)
- NetMundial Initiative
- Internet Governance Forum (IGF)
- OECD

# IG: Beginnings...Today

- WSIS Process; WSIS+10 Review and IGF....
- Global discussions in UN / OECD / UNESCO
- NetMundial Initiative
- New Initiative in WEF
- ITU WG on Internet Policy
- How do we engage going forward....

# Internationalization / Engagement – Who?

- I\* Organisations
- International Governmental Organisations (UN, ITU, OECD, UN, WTO, WIPO, World Bank...)
- ICANN Community (all the boxes)
- Regional Organisations (European Union, African Union...)
- Business organisations (ICC; Digital Europe, CBI)
- Users....

# Internationalization / Engagement – How?

- Through Regional VPs
- Working with ISOC/ RIRs etc.
- Through GAC; ccTLD; gNSO and ALAC;
- Through Regional ccTLD bodies
- Through business associations and civil society groups
- With UN Missions and IGOs in Geneva and New York

# How Does ICANN Do The Work?

## WHAT DOES ICANN DO?

To reach another person on the Internet you have to type an address into your device—a name or a number. That address must be unique, so computers will know where to find each other. ICANN maintains and administers these unique identifiers across the world. Without ICANN's management of this system, known as the Domain Name System (DNS), we wouldn't have a global, scalable Internet where we can find each other.

# ICANN's Role

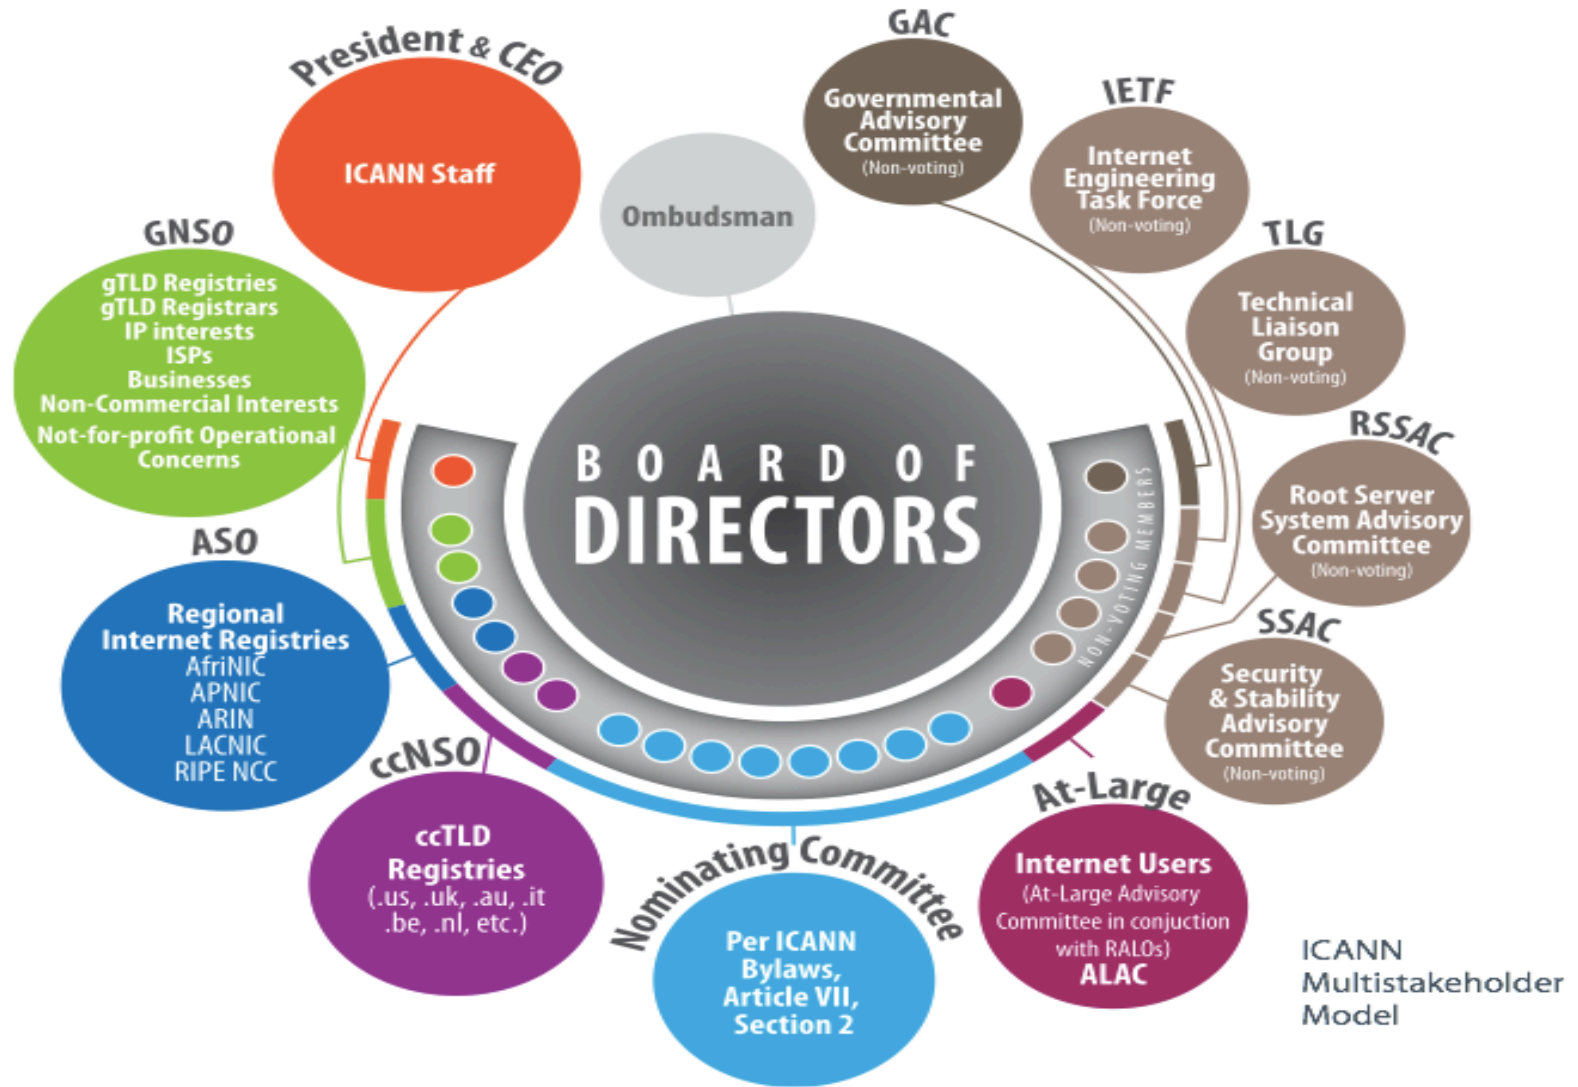

- ICANN is responsible for coordination of the global internet's unique identifiers; to ensure secure and stable operation of these systems
- ICANN staff does not create policy; we support and resource the worldwide community, who determine Internet policy in “bottom up” manner
- ICANN mandate is to make competition and choice available in a safe, secure operating environment. Examples are new gTLDs and IDN's

# MULTISTAKEHOLDER MODEL: BY SECTOR

# MULTISTAKEHOLDER MODEL: IN ICANN COMMUNITY

# ICANN Structure

## + Supporting Organizations (SOs)

- [Address Supporting Organization](#)
- [Country Code Names Supporting Organization](#) - 152 members
- [Generic Names Supporting Organization](#)

## + Board of Directors' Advisory Committees (ACs)

- [Governmental Advisory Committee](#)
- [At-Large Advisory Committee](#)
- DNS Root Server System Advisory Committee
- [Security & Stability Advisory Committee](#)

## + Technical Advisory Bodies

- Technical Liaison Group, made up of the European Telecommunications Standards Institute (ETSI), the ITU-T, the World Wide Web Consortium (W3C), and the Internet Architecture Board (IAB).
- Internet Engineering Task Force

# Private Sector & Civil Society

- Generic Name Supporting Organization (GNSO) is the group that develops policies and makes recommendations related to gTLDs to ICANN's Board
- Four broad Stakeholder Groups represent the variety of groups and individuals of the ICANN community
  - [Commercial Stakeholders Group](#)
  - [Non-Commercial Stakeholders Group](#)
  - [Registrars Stakeholder Group](#)
  - [Registries Stakeholder Group](#)
- 23 member GNSO Council governs policy development; sends 2 voting members to ICANN's Board

# Governments

- Governmental Advisory Council (GAC) provides advice to the Board and other SOs/ACs on issues of public policy and possible interaction between ICANN's activities or policies and national laws or international agreements
- Membership is open to all national governments and distinct economies
- Multi-national governmental organisations and treaty organisations may join as observers
- Approx. 149 governments have identified representatives; 32 Govt's hold Observer status
- Sends a non-voting representative to the Board; advice has a special status

# End User / At Large

- [At-Large Advisory Committee](#) is the ICANN home for individual Internet users
- Ground-up, tiered structure
- 183 At-Large Structures (RALOs) at grassroots level and growing
- Sends a voting member to ICANN's Board
- Increased quantity and quality of public policy statements

# How Does ICANN's Regional Staff Fit Into This Model ?

- Regional Strategies developed and implemented
- Stimulate multi-stakeholder engagement
- Work with our partners (**ISOC, Regional TLDs Organization, IETF, IGF, RIRs, and others**) to maintain bottom-up approaches on IG issues - which leads to the IGOs....

# ONE WORLD. ONE INTERNET.

## WHAT DOES ICANN DO?

To reach another person on the Internet you have to type an address into your device – a name or a number. That address must be unique, so computers will know where to find each other. ICANN maintains and administers these unique identifiers across the world. Without ICANN's management of this system, known as the Domain Name System or DNS, we wouldn't have a global, scalable Internet where we can find each other.

## Community-Driven Policy

To keep pace with dynamic technologies and rapid innovation, ICANN enables consensus-driven, multistakeholder policy development, with broad representation from the global Internet community.

## Multistakeholder Model:

Civil Society & Internet Users, the Private Sector, National & International Organizations, Governments, Research, Academic and Technical Communities are all represented.

## Competition & Choice

From accrediting over 1000 registrars, to introducing new Top Level Domains (TLDs), ICANN works to expand consumer choice by fostering competition and innovation in the domain name marketplace.

## WHICH FUNCTIONS DOES ICANN COORDINATE?

- Domain Name System (DNS)
- Internet Protocol (IP) address allocation
- Protocol-Parameter Registry
- Root Server Systems
- Generic Top-Level Domain name (gTLD) system management
- Country Code Top-Level Domain name (ccTLD) DNS
- Time zone database management

## Security & Stability

ICANN supports DNS security through technical training and engagement, coordinating and collaborating with the community in the implementation of standards such as DNSSEC.

## Interoperability

ICANN's work enables new technologies to flourish while maintaining interoperability across the global Internet. For example, management of the unique protocol identifiers allows communication using secure connections between users.

## Contractual Compliance

ICANN oversees the contracts it maintains and enforces the consensus policies developed through the community-driven process. ICANN's Contractual Compliance function seeks to ensure compliance with the agreements and the consensus policies.

## HOW DO I PARTICIPATE?

- Sign up for updates at [myicann.org](http://myicann.org)
- Join one of the many Public Comment Forums on ICANN's website
- Attend ICANN's Public Meetings in person or online to provide input at a Public Forum
- Join one of ICANN's Supporting Organizations or Advisory Committees

## WHO'S INVOLVED?

A number of groups, each of which represents a different interest on the Internet. All of them come together with the Board of Directors to shape ICANN decisions.

### Supporting Organizations

- Addressing
- Country Code Names
- Generic Names

### Advisory Committees

- At-Large
- Governmental
- Root Server System
- Security & Stability

### Technical Advisory Bodies

- Technical Liaison Group
- Internet Engineering Task Force

### Board of Directors

For more information or to get involved, please visit [www.ICANN.org](http://www.ICANN.org)

“ICANN meeting is one of the finest paths of learning of internet of things, building a circle of innovative, intelligent and talented people, exchanging of ideas and thoughts, and creating a bundle of social and technological adventures that you will never forget”.

# ICANN's Work

## POLICY MAKING

### WHAT DOES ICANN DO?

To reach another person on the Internet you have to type an address into your device—a name or a number. That address must be unique, so computers will know where to find each other. ICANN maintains and administers these unique identifiers across the world. Without ICANN's management of this system, known as the Domain Name System (DNS), we wouldn't have a global, scalable Internet where we can find each other.

### Multi-stakeholder Model:

Civil Society & International Users, the Private Sector, National & International Organizations, Governments, Research, Academic and Technical Communities are all represented.

### Community-Driven Policy

To keep pace with dynamic technologies and rapid innovation, ICANN enables consensus-driven, Multi-stakeholder policy development, with broad representation from the global Internet community.

### Who's Involved:

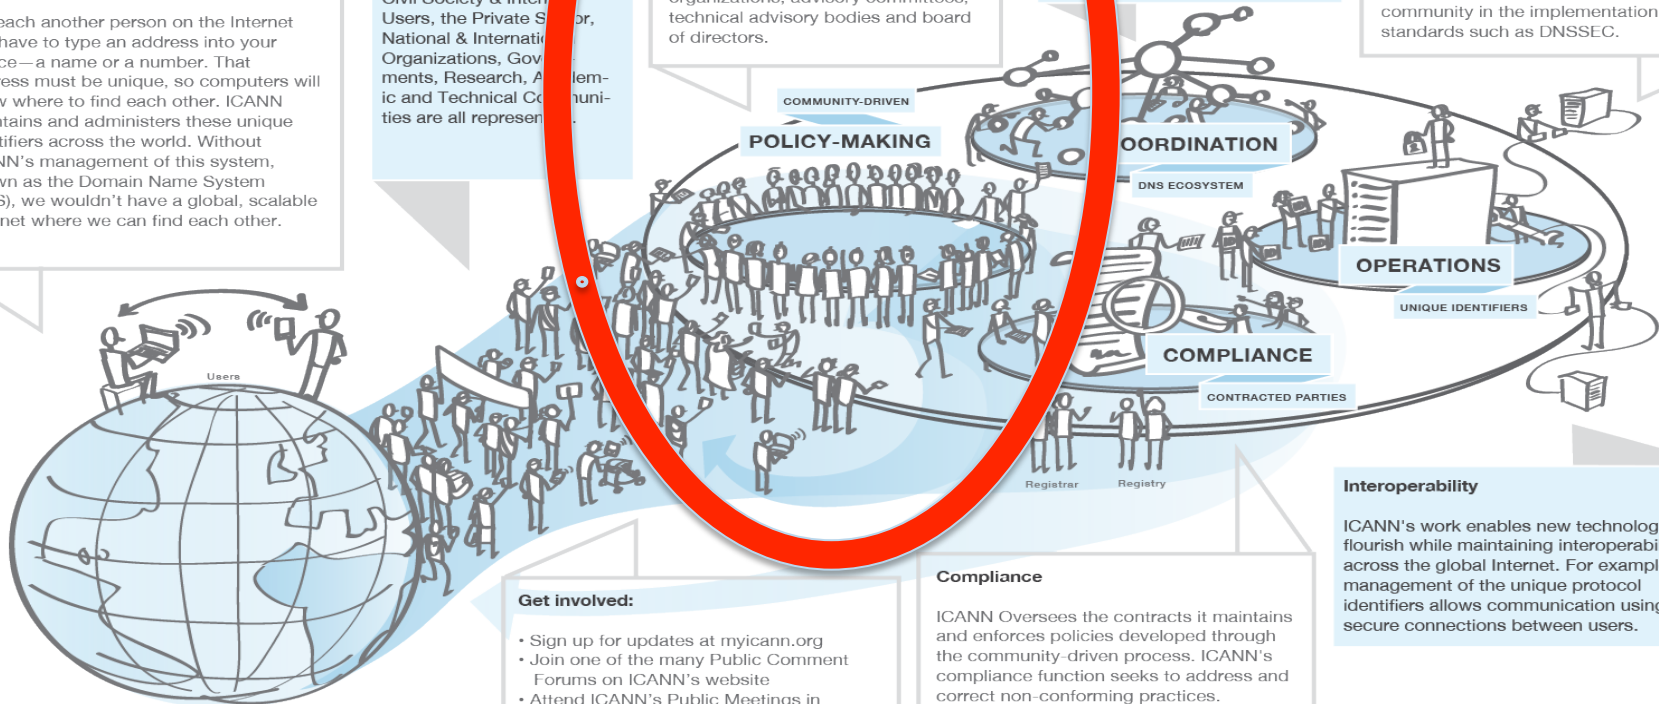

A number of groups: supporting organizations, advisory committees, technical advisory bodies and board of directors.

### Competition & Choice

From accrediting over 1000 registrars, to introducing new Top Level Domains (TLDs), ICANN works to expand consumer choice by fostering competition and innovation in the domain name marketplace.

### Security & Stability

ICANN supports DNS security through technical training and engagement, coordinating and collaborating with the community in the implementation of standards such as DNSSEC.

### Get involved:

- Sign up for updates at [myicann.org](http://myicann.org)
- Join one of the many Public Comment Forums on ICANN's website
- Attend ICANN's Public Meetings in person or online to provide input at a Public Forum
- Join one of ICANN's Supporting Organizations or Advisory Committees

### Compliance

ICANN Oversees the contracts it maintains and enforces policies developed through the community-driven process. ICANN's compliance function seeks to address and correct non-conforming practices.

### Interoperability

ICANN's work enables new technologies to flourish while maintaining interoperability across the global Internet. For example, management of the unique protocol identifiers allows communication using secure connections between users.

# Community Driven Policy – HOW?

**Multi-Stakeholder**

**Bottom-Up**

**Open**

**Transparent**

# Policy Processes – WHO?

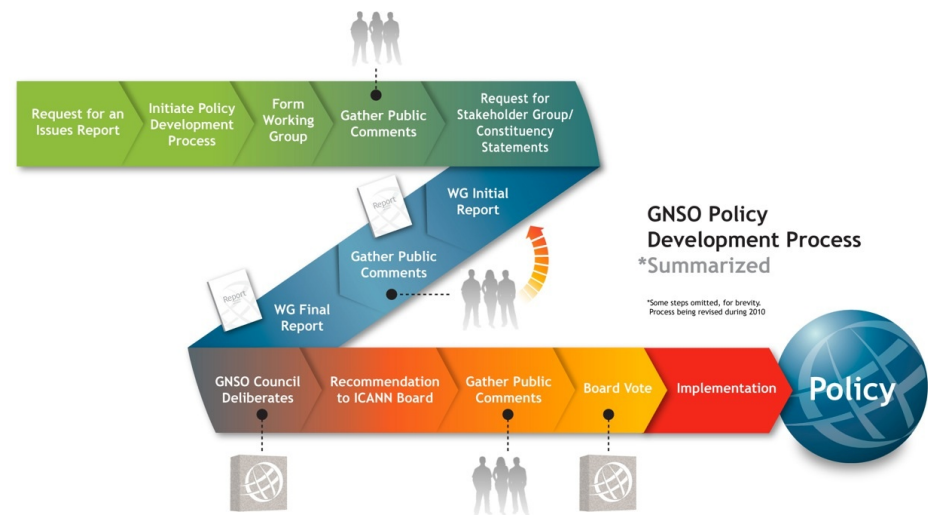

## ICANN Supporting Organizations (SO)

- GNSO - Generic Names Supporting Organization
- ccNSO - Country-Code Names Supporting Organization
- ASO - Address Supporting Organization

## ICANN Advisory Committees (AC)

- ALAC - At-Large Advisory Committee
- GAC - Governmental Advisory Committee
- SSAC - Security & Stability Advisory Committee
- RSSAC - Root Server System Advisory Committee

# Policy Processes – WHAT?

# Policy Development Staff Support

# Community-Driven Policy Support - WHY?

## Help The Community

- Create policies and guidelines that are:
  - Implementable and effective
  - Developed through a highly participative, fair, and balanced process in a timely and efficient way

## Support The Community

- Engage and support the participation of all necessary stakeholders
- Inform and educate stakeholders

## Manage Processes

- Manage the policy process efficiently and effectively to benefit the global Internet community
- ...frequently as important as outcomes

- Join one of ICANN's Supporting Organizations or Advisory Committees

### Compliance

ICANN Oversees the contracts it maintains and enforces policies developed through the community-driven process. ICANN's compliance function seeks to address and correct non-conforming practices.

### Interoperability

ICANN's work enables new technologies to flourish while maintaining interoperability across the global Internet. For example, management of the unique protocol identifiers allows communication using secure connections between users.

# What Are The IANA Functions?

- In 1998, ICANN was established as the steward and operator for the IANA functions
- The IANA functions are registries of the Internet's unique identifiers
- The unique identifiers include: protocol parameters; Internet numbers, and domain names
- ICANN maintains these lists according to policies adopted by Internet names, numbers and protocol standards communities

# Why is There an IANA Functions Operator ?

- To maintain the Internet unique identifier information needed to ensure the Internet interoperates globally
- If computers did not use the same system of identifiers and numbers to talk to one another, the system would not interoperate

# Summary

- ICANN as the IANA functions operator maintains the registries of unique numbering systems that keep the Internet interoperating
- High-profile, hierarchically-delegated, registries are used for the Domain Name System and Number Resources. ICANN maintains the publically available authoritative information for these registries.
- Most of the registries are straightforward, and are not generally known to the end-user
- ICANN operates the IANA functions under a contract between ICANN and the US Government

- Learn more about the IANA Department on Wednesday 900 – 1015 in Padang conference room

# IANA Stewardship Transition & Enhancing ICANN Accountability

Theresa Swinehart | Newcomers Session | 8 February 2015

# The U.S. Government's Announcement

**14 March 2014:** U.S. Government announces intent to transition its stewardship of the IANA functions to the global multistakeholder community.

- ⊙ Asked ICANN to convene global stakeholders to develop a proposal
- ⊙ Multistakeholder community has set policies implemented by ICANN for more than 15 years

**Why  
now?**

## **The U.S. Government's decision:**

- ⊙ Marks the final phase of the privatization of the DNS
- ⊙ Further supports and enhances the multistakeholder model of Internet policy making and governance

ICANN was asked to serve as a facilitator, based on its role as the IANA functions administrator

# Transition Requirements set by NTIA

NTIA has communicated that the transition proposal must have broad community support and address the following four principles:

Support and enhance the multistakeholder model

Maintain the security, stability and resiliency of the Internet DNS

Meet the needs and expectations of the global customers and partners of the IANA services

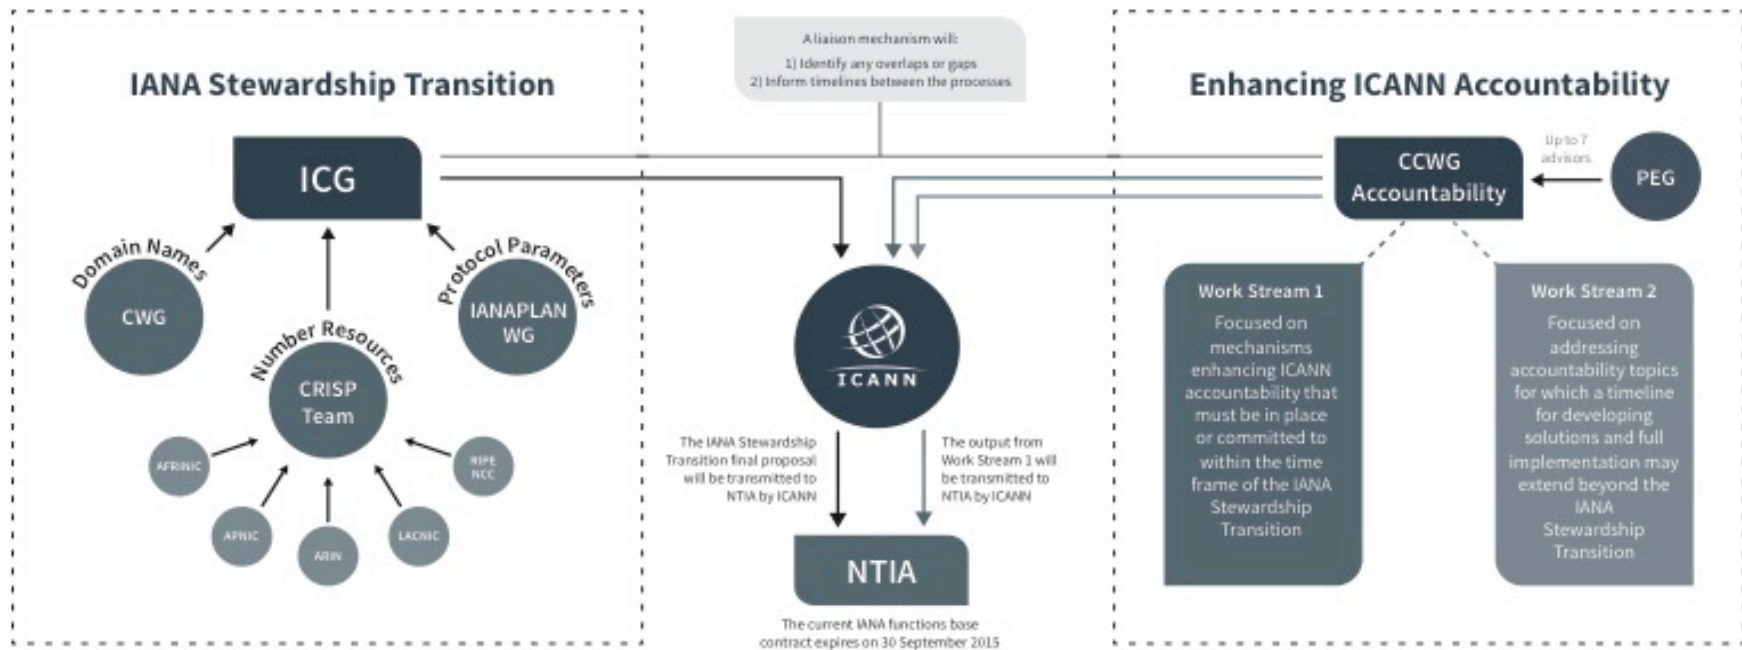

Maintain the openness of the Internet

NTIA also specified that it will **not** accept a proposal that replaces the NTIA role with a government-led or intergovernmental organization solution.

# High Level Overview of the IANA Stewardship Transition and Enhancing ICANN Accountability Processes

## Assessing accountability within the two processes

### IANA Stewardship Transition Final Proposal

Assessment of each operational community's respective oversight and accountability to the IANA functions

### Enhancing ICANN Accountability Process

Assessment of ICANN's accountability in light of its changing historical relationship with the U.S. Government

- ICG** IANA Stewardship Transition Coordination Group
- CRISP** Consolidated RIR IANA Stewardship Proposal Team
- CWG** Cross Community Working Group on Naming Related Functions
- CCWG** Accountability Cross Community Working Group
- PEG** Public Experts Group

For more information visit [www.icann.org](http://www.icann.org)

# Launching the multistakeholder process

ICANN launched a multistakeholder process and discussion to gather community views and input at the ICANN 49 Meeting in Singapore.

Based on this initial input, ICANN developed a draft process and issued a call for public comment to gather further community input.

© All translated into 5 official UN languages, plus Portuguese

## Community Response:

**700** email exchanges

**60** process contributions

Governments

Private sector

Civil society

Technical

Academics

End users

# Final Process Elements

## 1 Establishment of a Coordination Group

- ⊙ Has representation from all stakeholders
- ⊙ The community has self-selected its members
- ⊙ Established its own working methods and modes of operation
- ⊙ Encouraged to adhere to diversity standards
- ⊙ Supported by an independent, non-ICANN staff secretariat

## 2 ICANN serves as a convener and facilitator of the process

- ⊙ ICANN is a neutral facilitator in the process
- ⊙ Provides engagement and outreach, travel and additional support services

# Main Tasks of the ICG

Act as a **liaison** to all interested parties, including the three operational communities of the IANA functions

Assess the outputs of the three operational communities for **compatibility** and **interoperability**

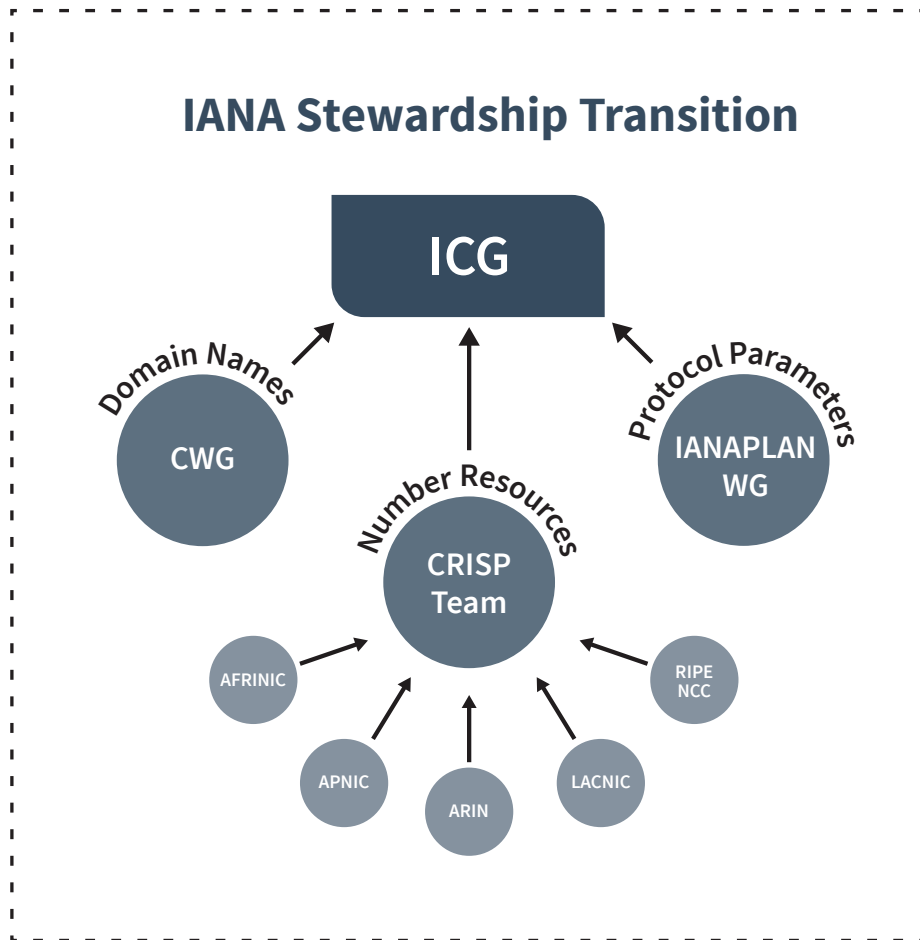

**Assemble** a complete proposal for the transition

**Information sharing** and public communication

# Request for Transition Proposal Structure

## Domain Names:

Cross Community Working Group to Develop an IANA Stewardship Transition Proposal on Naming Related Functions (**CWG-Stewardship**)

## Number Resources:

Consolidated RIR IANA Stewardship Proposal Team (**CRISP Team**)

## Protocol Parameters:

IANAPLAN Working Group (**IANAPLAN WG**)

# Enhancing ICANN Accountability

**As initial discussions around the transition took place, the community raised the broader topic of the impact of the change on ICANN's accountability.**

- ⦿ The transition would end the U.S. Government's historical contractual relationship with ICANN
- ⦿ This relationship has been perceived as a backstop with regard to ICANN's organization-wide accountability

**As a  
result**

ICANN launched a second process, parallel but interrelated with the IANA Stewardship Transition process, to examine from an organizational perspective how ICANN's broader accountability mechanisms should be strengthened to address the absence of the U.S. Government.

# Final Process Structure

## 1 Establishment of a Cross Community Working Group

## 2 Scope of accountability work will have two Work Streams

- ⊙ **Work Stream 1:** Focused mechanisms enhancing ICANN accountability that must be in place or committed to within the time frame of the IANA Stewardship Transition
- ⊙ **Work Stream 2:** Focused on addressing accountability topics for which a timeline for developing solutions and full implementation may extend beyond the IANA Stewardship Transition

## 3 Involvement of external Advisors

- ⊙ The Public Experts Group has selected 6 Advisors to provide external expertise and best practices to help contribute to the dialogue
- ⊙ These advisors will not participate in calls for consensus

## 4 Role of the ICANN Board

- ⊙ Will consider the outputs from Work Stream 1 and Work Stream 2
- ⊙ A Board liaison will be involved in discussions robustly, bringing the voice and experience of the Board into the development of recommendations

## There are currently **166 people** in the Cross Community Working Group on Enhancing ICANN Accountability (CCWG-Accountability):

**25 Members**

Chartering organization-appointed members

**141 Participants**

Actively contribute to mailing list conversations and meetings

**38 Mailing List Observers**

Read-only access to mailing list

Will host two working sessions at ICANN 52 and one Engagement Session.

## Join the CCWG-Accountability

**Individual Participants** – anyone interested can volunteer to join the CCWG as a "participant", regardless of whether they are members of the ICANN community. Participants are expected to actively contribute to mailing list conversations as well as meetings.

**Mailing list observers** – for those who are merely interested to monitor the CCWG conversations, there is the possibility to sign up as a mailing list "observer" which offers read-only access to

# Sessions at ICANN 52

## IANA Stewardship Transition

Process: [Process to Develop the Proposal and Next Steps](#)

Recent Developments:

### ICG to Discuss Proposals at Upcoming Face-to-Face Meeting

The ICG will be discussing the protocol parameters and numbers proposals at their face-to-face meeting in Singapore on February 6. As such, the ICG requests that community comments concerning those two proposals or the processes used to create them be sent to [icg-forum@icann.org](mailto:icg-forum@icann.org) by February 4 at 23:59 UTC. See announcement [here](#).

## Enhancing ICANN Accountability

Process: [Enhancing ICANN Accountability: Process and Next Steps](#) (Revised 10 October)

Recent Developments:

### 7th Advisor to CCWG Selected

The Public Experts Group (PEG) has [announced](#) its selection of an International Law Advisor to the Enhancing ICANN Accountability Process.

### Co-Chairs of the CCWG-Accountability issue high level response to letter from CWG-Stewardship

# Transition-Accountability Landing Page

## Open Public Comments

Via [icg-forum@icann.org](mailto:icg-forum@icann.org), the ICG invites community comments concerning protocol parameters and numbers proposals or the processes used to create them by **February 4 at 23:59 UTC**.

## Background

### IANA Stewardship Transition

Shortly after the [NTIA Announcement](#) of 14 March 2014, ICANN [launched](#) a multistakeholder process and discussion to gather community views and input on the principles and mechanisms for the transitioning of NTIA's stewardship of the IANA functions.

Following a month-long [call for input](#) on the community-driven draft proposal, on 6 June, ICANN posted the [Process to Develop the Proposal and Next Steps](#). After a call for names, the IANA Stewardship Transition Coordination Group (ICG) was formed comprised of individuals selected by each represented community. This group will be responsible for coordinating a community proposal to transition the stewardship of the IANA functions from NTIA to the global multistakeholder community.

### Enhancing ICANN Accountability

As initial discussions around the transition took place, the community also raised the broader topic of the impact of the change on ICANN's accountability. This transition would end the U.S. Government's contractual relationship with ICANN that has existed since 1998, which has been perceived as a backstop with regard to ICANN's organization-wide accountability.

### Overview

Welcome to the [NTIA IANA Functions' Stewardship Transition](#) microsite, a comprehensive destination for discussion, contribution, and collaboration related to the [NTIA's announcement and request](#) of 14 March 2014.

As convener of the process to develop a transition proposal, [ICANN](#) has made available the tools and resources to facilitate the discussion and capture the views and comments of the global multistakeholder community.

This microsite will serve as a resource and information-sharing platform for all interested parties, as well as the primary tool for the [IANA Stewardship Transition Coordination Group \(ICG\)](#) to keep global stakeholders updated on all developments.

## Recent Developments

### ICG to Discuss Proposals at Upcoming Face-to-Face Meeting

The ICG will be discussing the protocol parameters and numbers proposals at their face-to-face meeting in Singapore on February 6. As such, the ICG requests that community comments concerning those two proposals or the processes used to create them be sent to [icg-forum@icann.org](mailto:icg-forum@icann.org) by February 4 at 23:59 UTC. See announcement [here](#).

### Upcoming ICG Meetings

- **Face-to-Face Meeting: 6-7 February 2015**
- Responses to the ICG RFP Regarding the IANA Stewardship Transition (ICANN 52)

### Development of Community Proposals for the ICG Request for Transition Proposals

#### Domain Names

**Current draft:** <https://www.icann.org/en/system/files/files/cwg-naming-transition-01dec14-en.pdf>

**Status: Still in development**

The Cross Community Working Group (CWG) on Naming Related Functions held an intensive work weekend on 10-11 January 2015. The weekend comprised four two-hour

## Background

Shortly after the [NTIA Announcement](#) of 14 March 2014, ICANN [launched](#) a multistakeholder process and discussion to gather community views and input on the principles and mechanisms for the transitioning of NTIA's stewardship of the IANA functions.

Following a month-long [call for input](#) on the community-driven draft proposal, on 6 June, ICANN posted the [Process to Develop the Proposal and Next Steps](#).

Then following a call for names, the IANA Stewardship Transition Coordination Group (ICG) was formed comprised of individuals selected by each represented community. These 30 individuals represent 13 communities of both direct and indirect stakeholders who together will deliver a proposal to the NTIA recommending a transition plan of NTIA's stewardship of IANA functions to the Internet community, consistent with the key principles outlined in the NTIA March 14 announcement. The ICG will conduct itself transparently, consult with a broad range of stakeholders and ensure that its final recommendations support the security and stability of the

On 6 June 2014, [ICANN](#) published a Process to [Develop the Proposal and Next Steps](#) that is the culmination of a series of community discussions and input into the process to develop a proposal to transition stewardship of the [IANA](#) functions to the global multistakeholder community. The document reflects the multitude of views expressed in different fora and calls for the establishment of, among other things, a Coordination Group.

The [IANA](#) Stewardship Transition Coordination Group ([ICG](#)) is comprised of 30 individuals representing 13 communities, and includes direct and indirect stakeholders.

The community is encouraged to view the [ICG](#) links located in the navigation table to the right to access the most up to date information on the [IANA](#) Stewardship Transition Coordination Group.

## Recent Developments

### 26 January

Joint CWG-Stewardship & CCWG-Accountability Chairs' Statement [here](#).

### 23 January

The CCWG co-Chairs issue a [statement](#) following the first face-to-face meeting of the CCWG in Frankfurt, Germany on 19-20 January 2015

### 8 January

The CCWG co-Chairs issued a [high level response](#) to the CWG-Stewardship co-Chairs' [letter](#) regarding potential areas of overlap between the groups

### 17 December

PEG announces 6 Advisors to the CCWG-Accountability (see [here](#))

### 9 December

The first online meeting of the CCWG-Accountability was on Tuesday 9 December 2014 at 20:00 UTC. The meeting notes, transcripts, and recordings are available [here](#).

### 9 December

ASO elects to adopt CCWG charter ([see email here](#))

### 8 December

GAC elects to adopt CCWG charter ([see email here](#))

### 2 December

Organizations that chartered the CCWG announced a [call for volunteers](#) to join the effort.

### 20 November

ccNSO elects to adopt CCWG charter.

### 18 November

ALAC elects to adopt CCWG charter. ([Poll results located here](#))

### 13 November

GNSO elects to adopt CCWG charter. ([Motion located here](#))

### 3 November

Drafting team [distributes](#) CCWG charter.

## Important Information

The next meeting of the CCWG-Accountability will be on **Tuesday 3 February 2015 at 12:00 UTC**.

To view a full list of upcoming meetings, see [Meetings](#).

### Join the CCWG-Accountability

There are two ways to volunteer:

- **Individual Participants** – anyone interested can volunteer to join the CCWG as a "participant", regardless of whether they are members of the ICANN community. Participants are expected to actively contribute to mailing list conversations as well as meetings. It is anticipated that participants will provide essential input to the process. They will participate similarly to ICANNchartering organization-appointed members and will be required to provide a Statement of Interest (SOI).
- **Mailing list observers** – for those who are merely interested to monitor the CCWG conversations, there is the possibility to sign up as a mailing list "observer" which offers read-only access to the mailing list. Mailing list observers will not be permitted to post, will not receive invitations to the various meetings or calls of the CCWG (note that audio streaming will be provided for those interested to follow the CCWG meetings) and will not have to complete a statement of interest (see below). At any point in time, a mailing list observer can join the CCWG as a participant simply by informing ICANN staff.

In addition, there will be opportunities to provide input through public consultations and public comment processes that the CCWG is expected to organize.

If you are interested in joining the CCWG as an individual participant or mailing list observer, please contact Grace Abuhamad ([accountability-staff@icann.org](mailto:accountability-staff@icann.org)).

## CCWG Statistics & Diversity

Created by Berry Cobb, last modified by Grace Abuhamad on Feb 04, 2015 [Translate](#)

There are currently 166 people in the CCWG-Accountability.

**25 Members | 141 Participants**

and 40 Mailing List Observers

Of the 166 CCWG-Accountability members and participants, the regional representation is as follows:

- 41 North America
- 39 Europe
- 32 Asia/Asia Pacific
- 27 (not specified)
- 18 Africa
- 9 Latin America

Of the 166 CCWG-Accountability members and participants, the stakeholder group representation is as follows:

- 65 (no affiliation)
- 41 GNSO
- 25 GAC
- 20 At-Large
- 11 ccNSO/ccTLD
- 4 ASO

In addition, there is one ICANN Board Liaison and one ICANN Staff Representative.

## CCWG ACCT Meeting #10 (3 February 2015)

Created by Grace Abuhamad, last modified on Feb 04, 2015 Translate

### Attendees:

**Members:** Alan Greenberg, Athina Fragkouli, Cheryl Langdon-Orr, Eberhard Lisse, Fiona Asonga, Julia Wolman, Leon Sanchez, Mathieu Weill, Olga Cavalli, Par Brumark, Robin Gross, Roelof Meijer, Sebastien Bachollet, Steve DelBianco, Thomas Rickert, Tijani Ben Jemaa (16/25)

**Participants:** Alain Bidron, Andria Beccalli, Avri Doria, Barrack Otieno, Bob Takacs, Caitrin Dwyer, David McAuley, Finn Petersen, Greg Shatan, John Poole, Keith Drazek, Laena Rahim, Lars Erik Forsberg, Mark Carvell, Martin Boyle, Matthew Shears, Olivier Muron, Pedro Ivo Silva, Phil Buckingham, Rafael Perez Galindo, Sabine Meyer, Stephanie Duchesneau, Thomas Schneider, Tomohiro Fujisaki, Vrikson Acosta, Wolf Ludwig (26)

**Staff:** Adam Peake, Alice Jansen, Berry Cobb, Brenda Brewer, Grace Abuhamad, Marika Konings

**Apologies:** David Maher, Rudi Daniel; Jordan Carter; James Bladel; Sam Eisner

**\*\*Please let Grace know if your name has been left off the list (attendees or apologies).\*\***

Transcript will be posted here as available

### Recording

The Adobe Connect recording is available here: <https://icann.adobeconnect.com/p3n7g7tcb1f/>

The audio recording is available here: <http://audio.icann.org/gnso/gnso-ccwg-acct-03feb15-en.mp3>

### Notes

#### 1. Welcome & roll call & SOI

- SOIs are still missing.

## Sub-Group Work Areas

Created by Grace Abuhamad, last modified by Hillary Jett on Dec 17, 2014 Translate

### Work Area 1: Existing Accountability Mechanisms (including ATRT 1 & ATRT 2 Recommendations)

**Coordinators/Rapporteurs:** David Maher / Samantha Eisner

Wiki Link: <https://community.icann.org/x/YIMQAw>

Mailing list address: [ccwg-accountability1@icann.org](mailto:ccwg-accountability1@icann.org)

Public Archives: <http://mm.icann.org/pipermail/ccwg-accountability1/>

### Work Area 2: Review Input from Public Comment and Categorize Items into Work Streams 1 & 2

Deliverable: list of items that have been suggested and identify whether these belong in WS1, WS2 or both.

**Coordinator/Rapporteur:** Steve DelBianco

Wiki Link: <https://community.icann.org/x/YoMQAw>

Mailing list address: [ccwg-accountability2@icann.org](mailto:ccwg-accountability2@icann.org)

Public Archives: <http://mm.icann.org/pipermail/ccwg-accountability2/>

### Work Area 3: Review Issues Identified by CWG-Stewardship

**Coordinator/Rapporteur:** TBC

Link: <https://community.icann.org/x/ZoMQAw>

Mailing list address: [ccwg-accountability3@icann.org](mailto:ccwg-accountability3@icann.org)

Public archives: <http://mm.icann.org/pipermail/ccwg-accountability3/>

# ICANN's Work

## DNS Industry Services

- Sign up for updates at [myicann.org](http://myicann.org)
- Join one of the many Public Comment Forums on ICANN's website
- Attend ICANN's Public Meetings in person or online to provide input at a Public Forum
- Join one of ICANN's Supporting Organizations or Advisory Committees

# ICANN's Global Domain Division (GDD)

## What we do

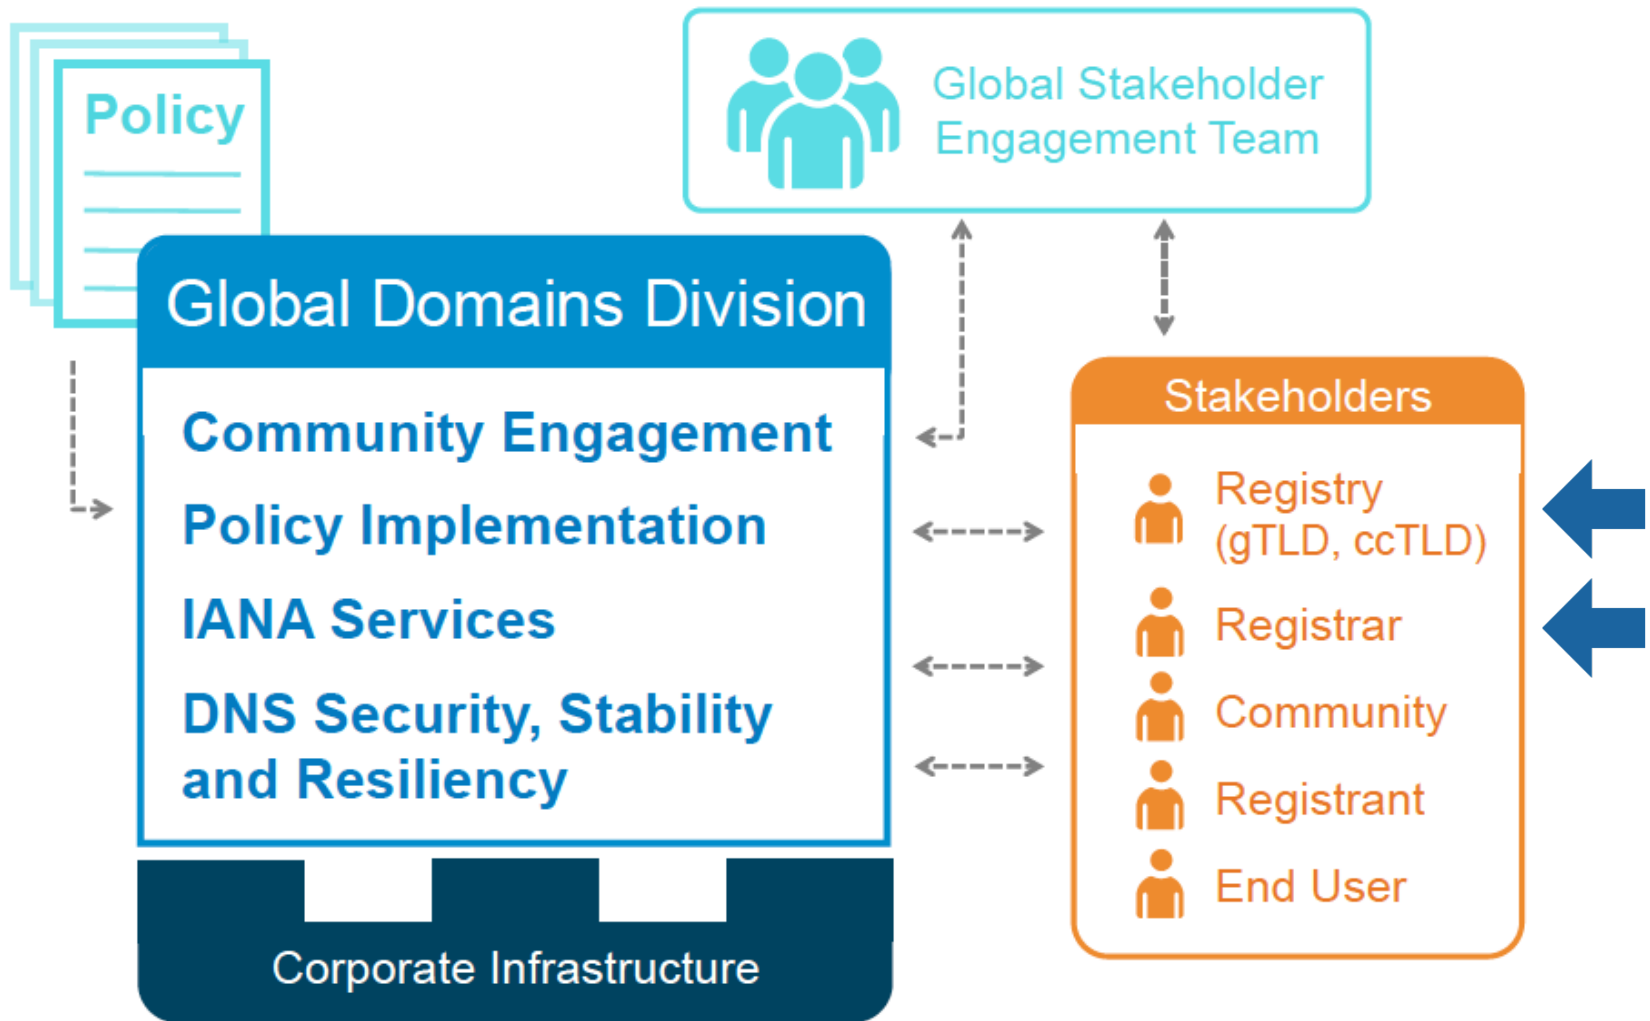

GDD is the unit of ICANN that engages the Internet community to implement ICANN policies through contracts and services, and delivers IANA functions.

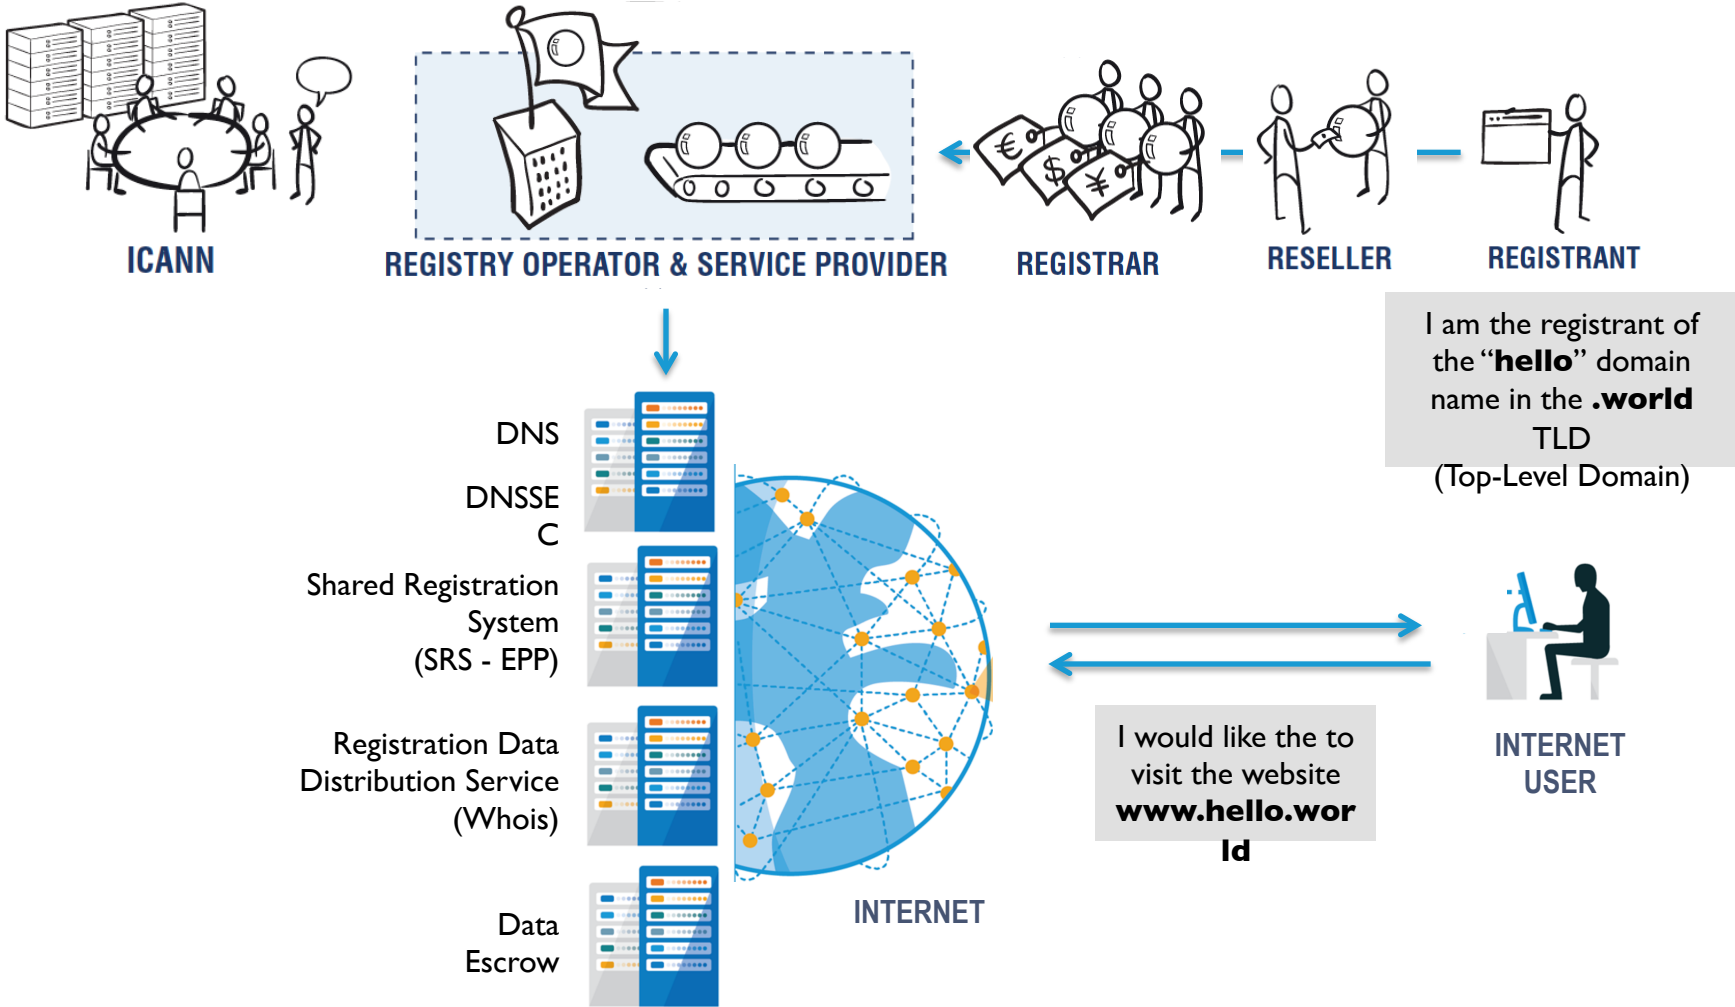

## Mission

To serve the global public interest, the registrants and end-users of the Internet by ensuring a secure and stable domain name system (DNS), while promoting trust, choice, and competition in the domain name service industry.

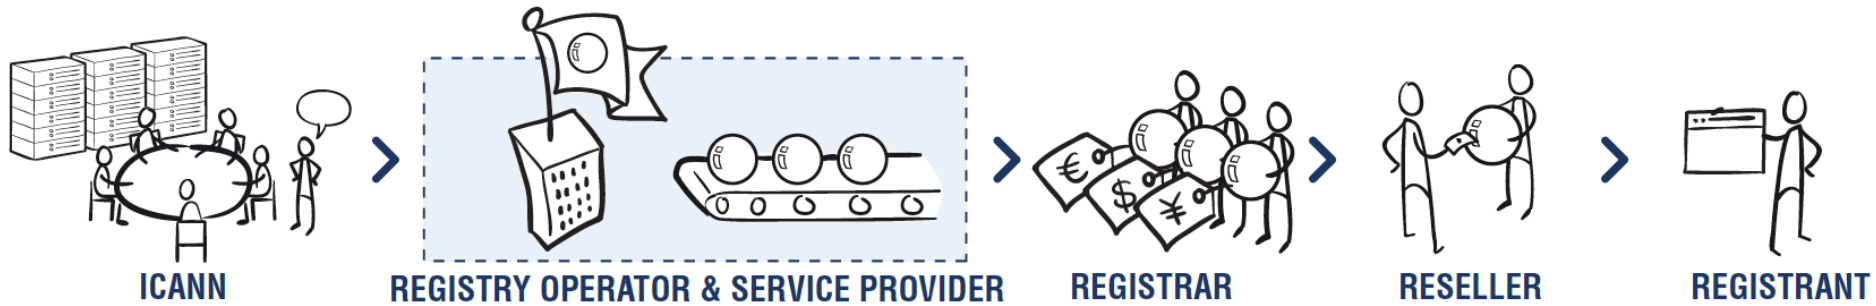

# The Role of GDD at ICANN

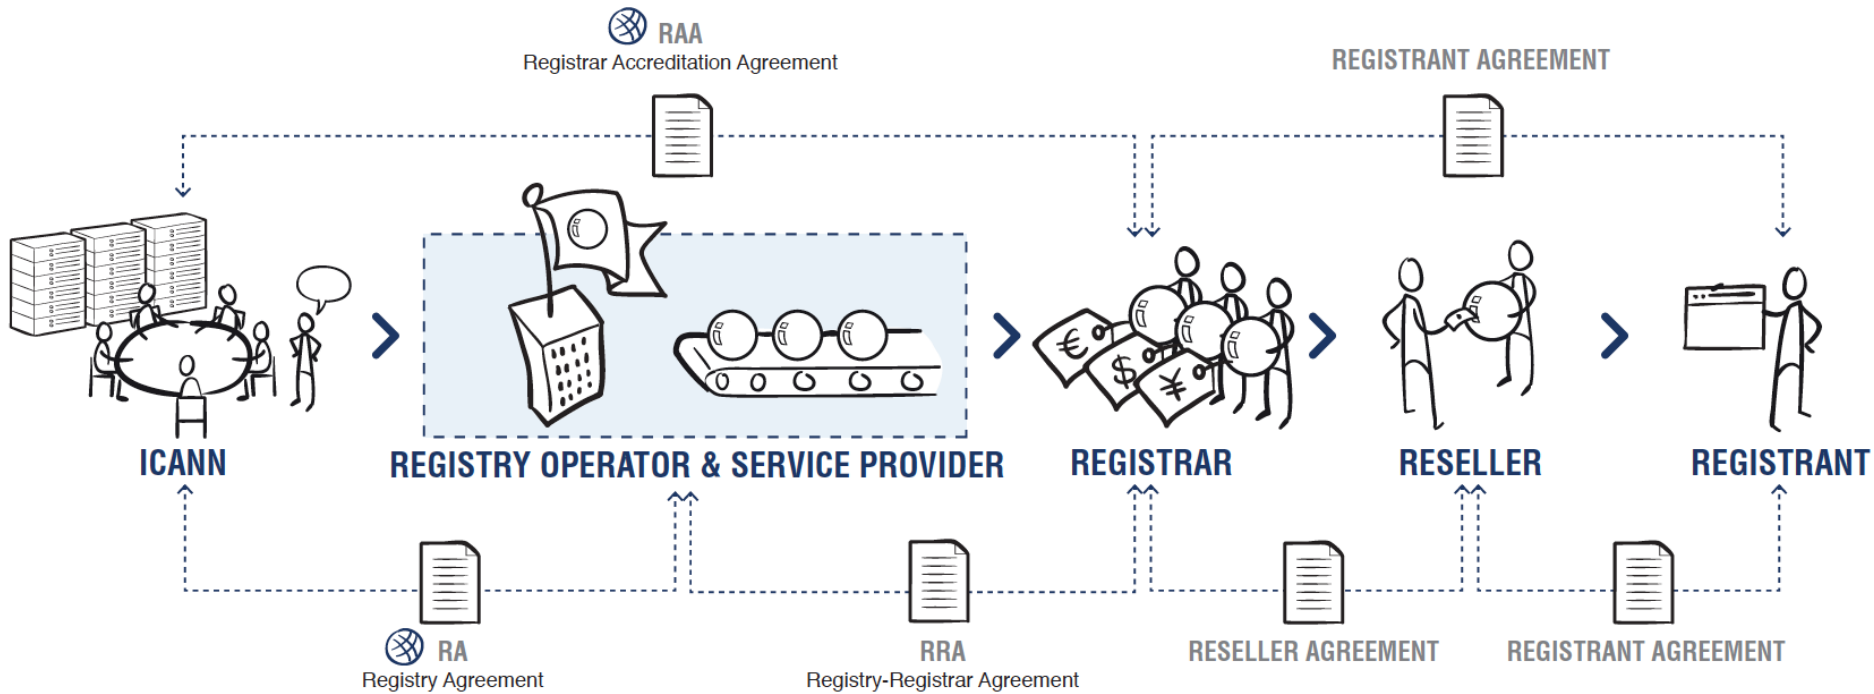

# DNS Industry: Key Stakeholders

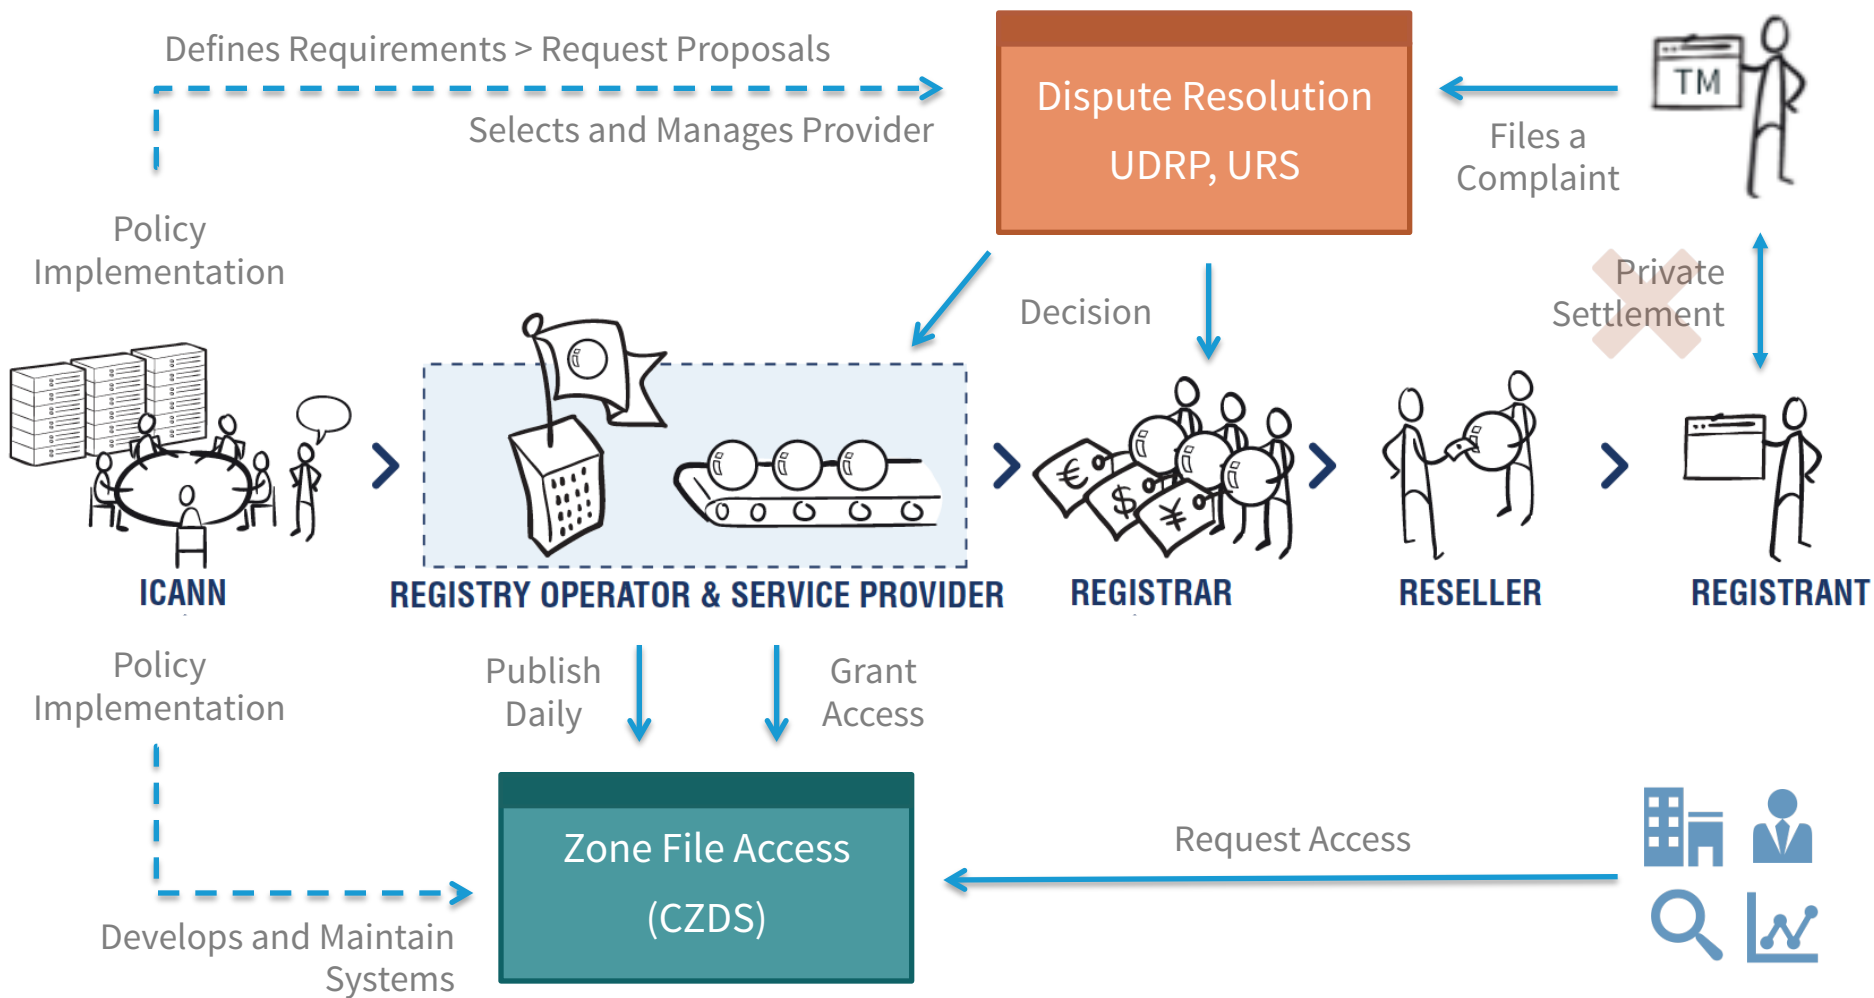

# DNS Industry and ICANN: Contracts

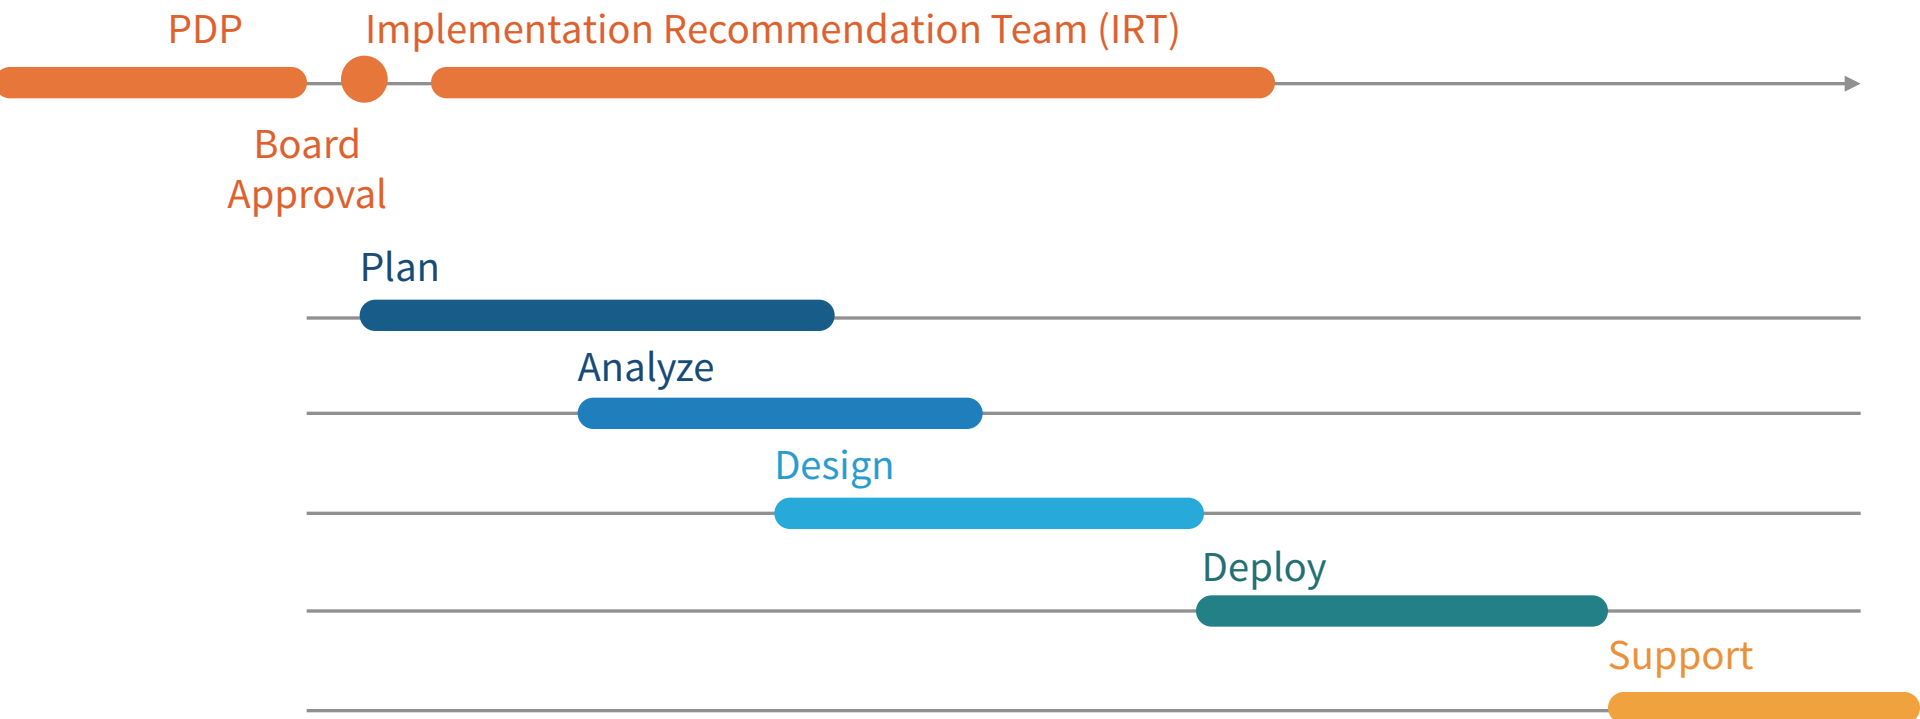

# DNS Industry and ICANN: Contracts

# DNS Industry and ICANN: Services

# How Policies Are Implemented

**PDP:** early engagement, consideration and feedback to policy work products

**Plan:** develop project plan, work breakdown

**Analyze :** impact assessment, cost/benefit analysis, define requirements, seek solutions

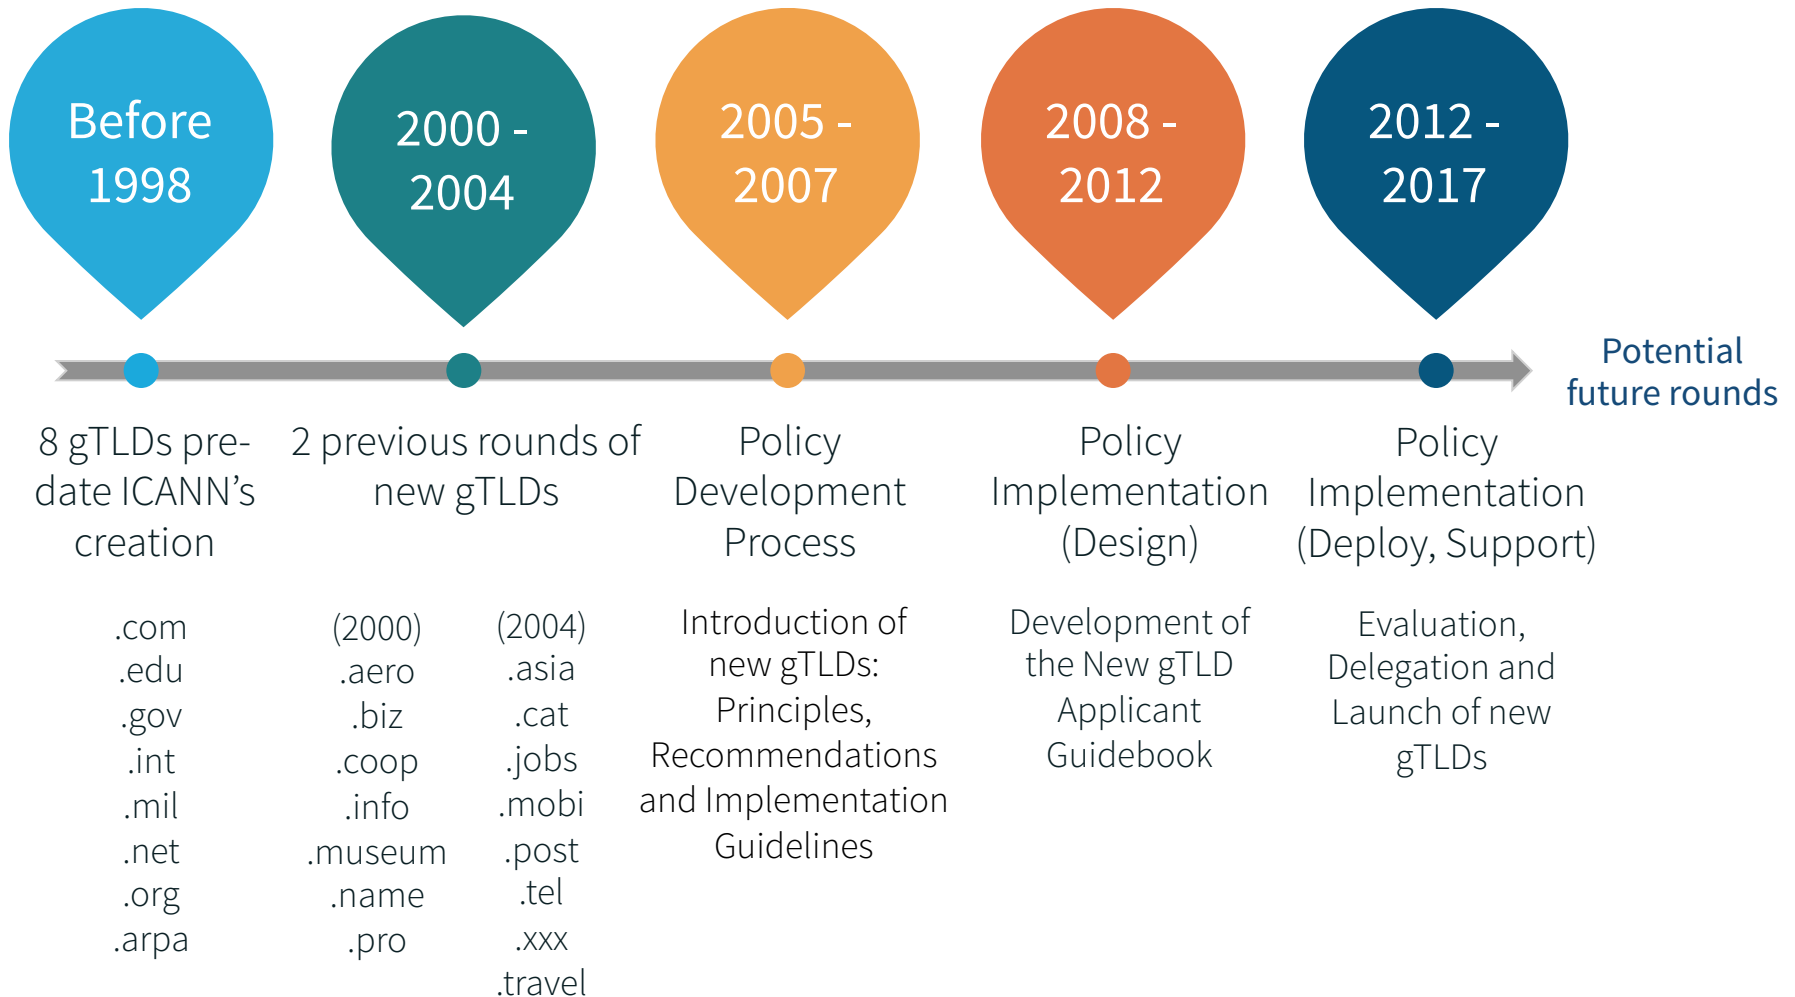

**Design:** select solution and develop systems or services

**Deploy :** phased delivery of systems / services under change and release management control

**Support :** steady-state operation of systems and services, including contractual compliance

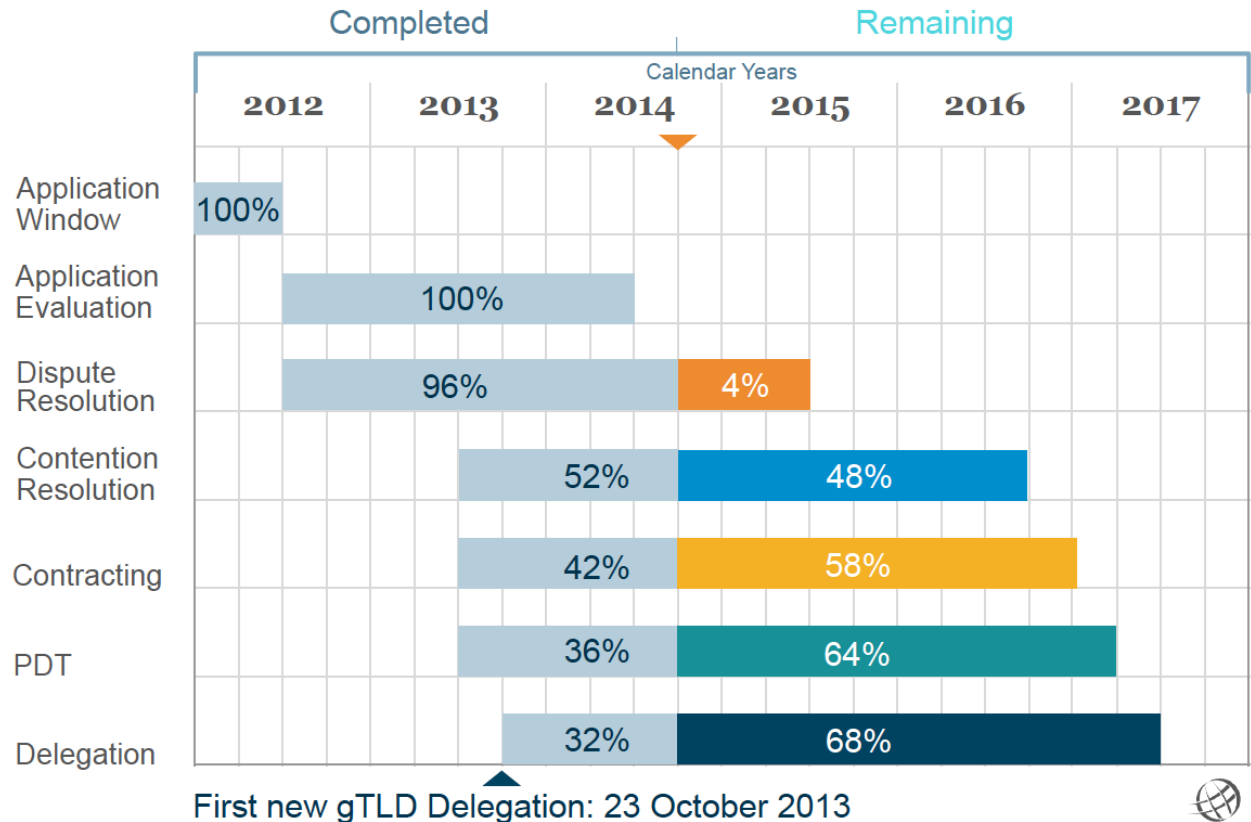

# A Policy Implemented: The New gTLD Program

# Magnitude and Status of New gTLD Program

- 1930 applications
- 1300+ potential TLDs delegated by 2017
- 487 new gTLDs delegated (as of 23 Jan. 2015)
- 40 IDN gTLDs delegated (103 applications)

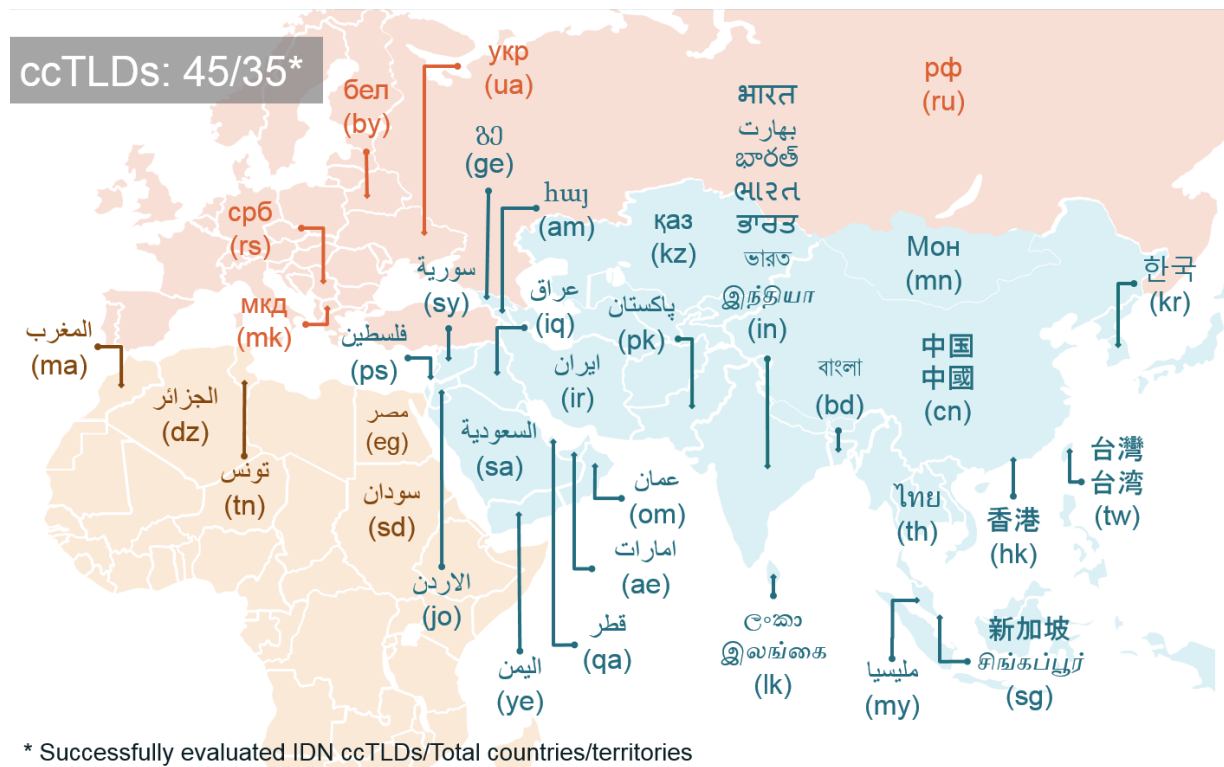

Note: This graphic depicts forecast completion dates based on current program operations; forecast dates are subject to change

# Focus on IDN TLDs : What are they ?

## Internationalized Domain Names Top Level Domains

- Historically top level domains were limited to a-z in Latin script: .com, .org, .sg, .cn, .lk ...
- IDN TLDs are labels in different scripts – e.g. Arabic, Chinese, Cyrillic, Devanagari, Greek, Thai, etc.
- A number of IDN ccTLDs and IDN gTLDs are now delegated

## Speak up for your language !

- To form a Latin-ASCII TLD label, only letters are allowed (a - z) – no digits or symbols
- How to decide which characters to allow to form IDN TLD labels for different scripts of the world?
  - ICANN is seeking volunteers to form community based groups to determine these script based rules
  - Volunteer today by sending an email to [identlds@icann.org](mailto:identlds@icann.org) and tell us your language and script

Arabic  
Bengali  
Chinese  
Cyrillic  
Devanagari  
Georgian  
Greek  
Gujarati  
Gurmukhi  
Hebrew  
Japanese  
Korean  
Latin  
Sinhala  
Tamil  
Telugu  
Thai

# ICANN's Work

## Security, Stability, Resiliency

### WHAT DOES ICANN DO?

To reach another person on the Internet you have to type an address into your device—a name or a number. That address must be unique, so computers will know where to find each other. ICANN maintains and administers these unique identifiers across the world. Without ICANN's management of this system, known as the Domain Name System (DNS), we wouldn't have a global, scalable Internet where we can find each other.

### Multi-stakeholder Model:

Civil Society & Internet Users, the Private Sector, National & International Organizations, Governments, Research, Academic and Technical Communities are all represented.

### Community-Driven Policy

To keep pace with dynamic technologies and rapid innovation, ICANN enables consensus-driven, Multi-stakeholder policy development, with broad representation from the global Internet community.

### Who's Involved:

A number of groups: supporting organizations, advisory committees, technical advisory bodies and board of directors.

### Competition & Choice

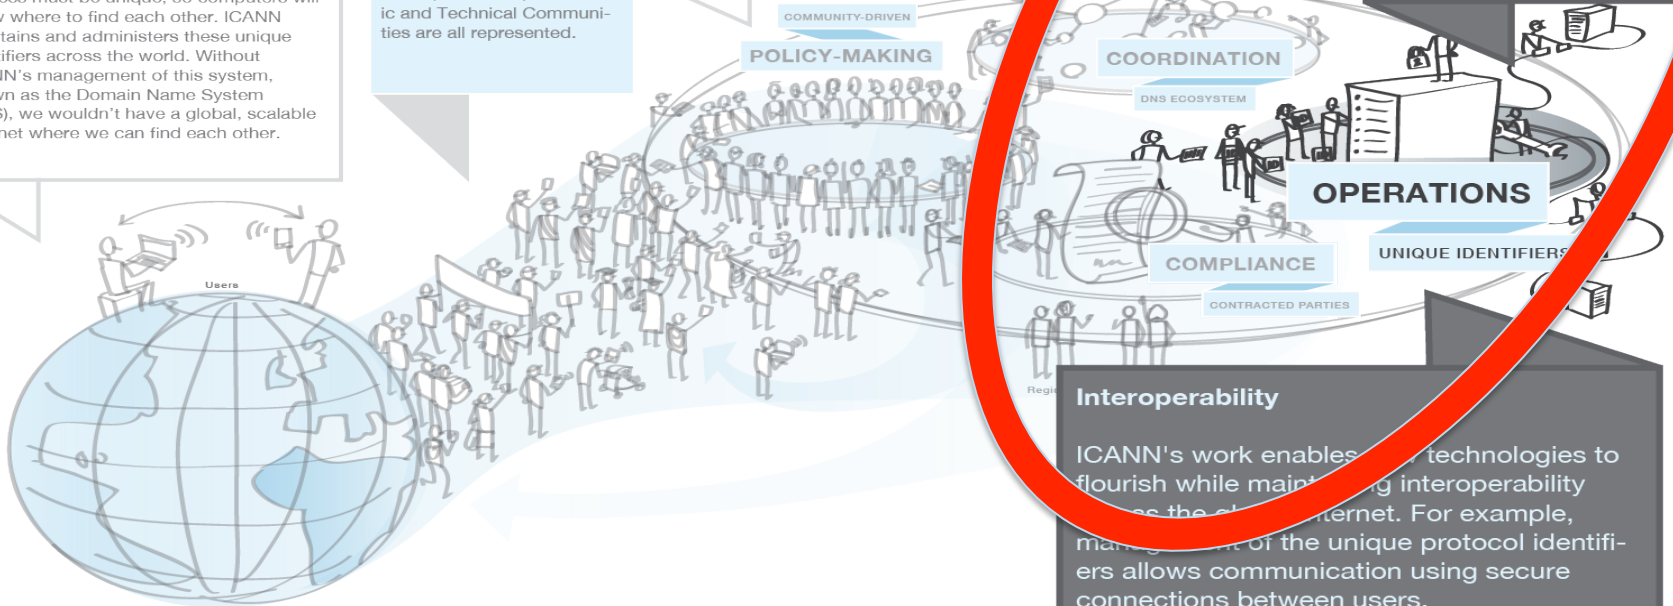

From accrediting over 1000 registrars, to introducing new Top Level Domains (TLDs), ICANN works to expand consumer choice by fostering competition and innovation in the domain name marketplace.

### Security & Stability

ICANN supports DNS security through technical training and engagement, coordinating and collaborating with the community in the implementation of standards such as DNSSEC.

### Interoperability

ICANN's work enables new technologies to flourish while maintaining interoperability across the global Internet. For example, management of the unique protocol identifiers allows communication using secure connections between users.

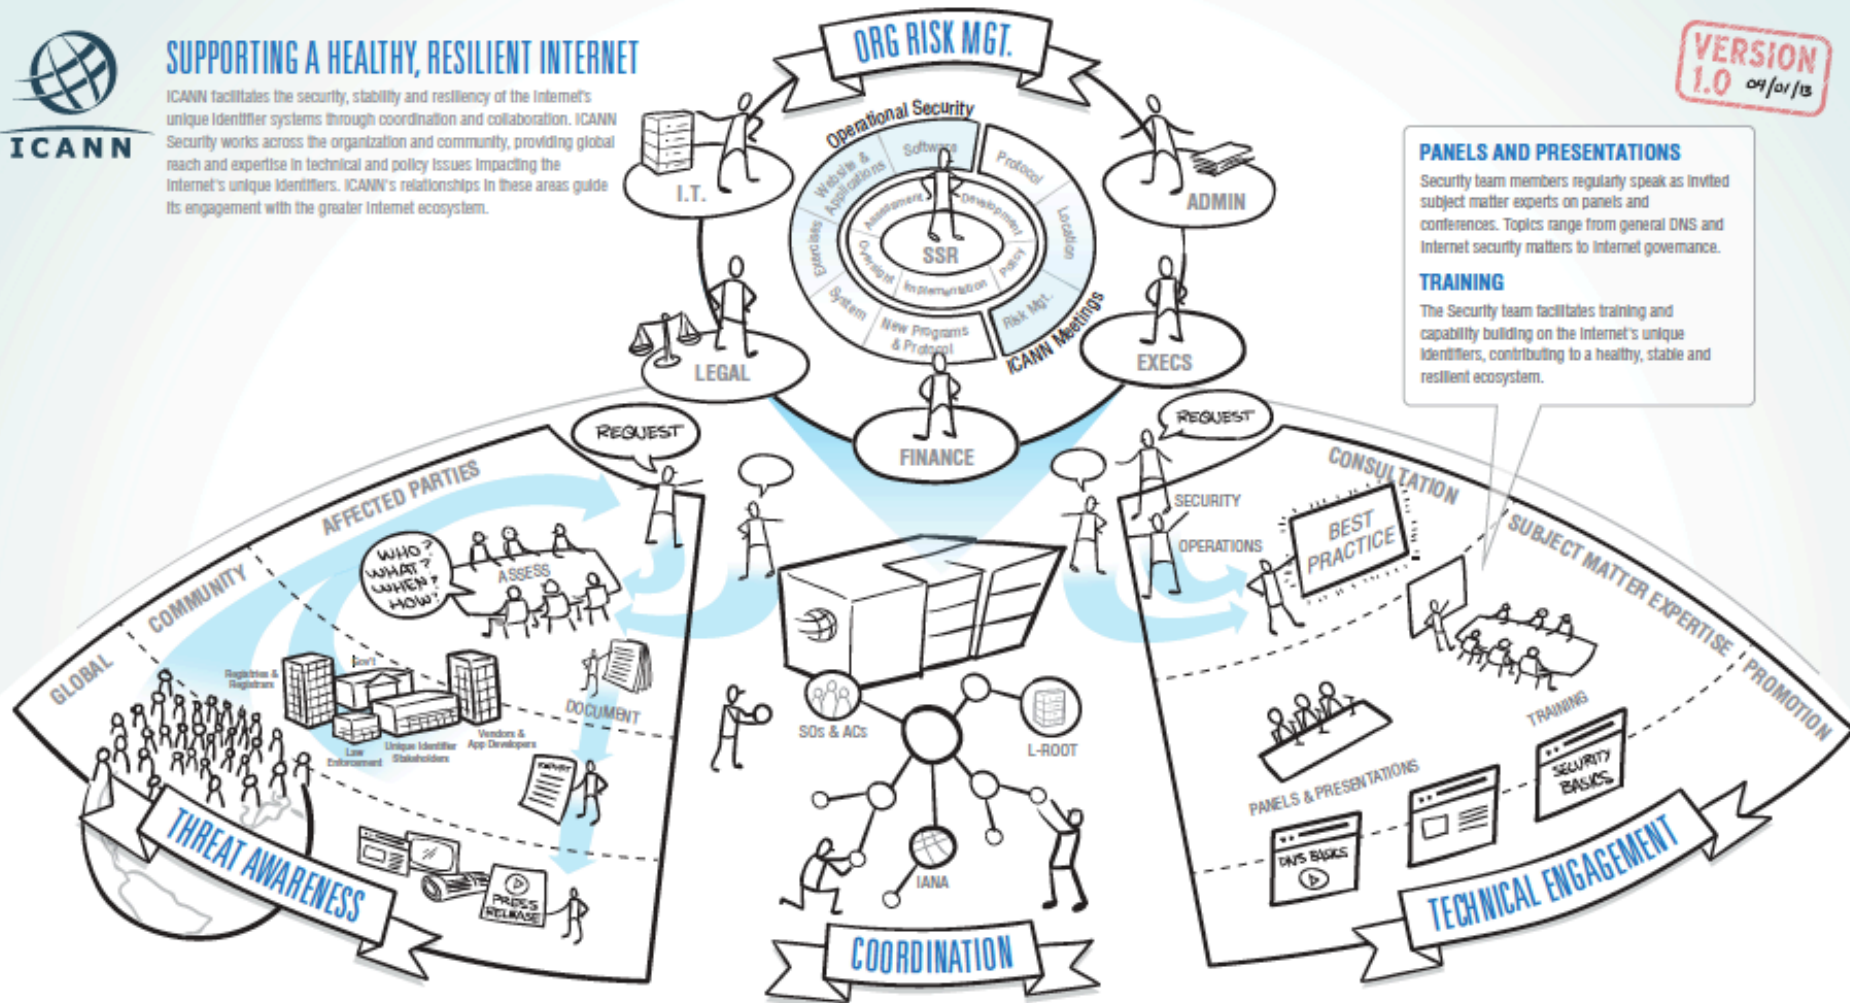

# SUPPORTING A HEALTHY, RESILIENT INTERNET

ICANN facilitates the security, stability and resiliency of the Internet's unique identifier systems through coordination and collaboration. ICANN Security works across the organization and community, providing global reach and expertise in technical and policy issues impacting the Internet's unique identifiers. ICANN's relationships in these areas guide its engagement with the greater Internet ecosystem.

VERSION 1.0 04/01/15

**PANELS AND PRESENTATIONS**  
Security team members regularly speak as invited subject matter experts on panels and conferences. Topics range from general DNS and Internet security matters to Internet governance.

**TRAINING**  
The Security team facilitates training and capability building on the Internet's unique identifiers, contributing to a healthy, stable and resilient ecosystem.

## COORDINATE & COLLABORATE

The Security team is regularly invited to speak with community stakeholder groups, and facilitates activity with ICANN's Supporting Organizations and Advisory Committees.

## PUBLICIZE & PROMOTE

The Security team provides thought leadership in the form of white papers, blog posts and the annual Security, Stability & Resiliency Framework for ICANN.

Team members represent ICANN at various conferences and events worldwide, speaking on cybersecurity and governance, the Internet's unique identifiers and ICANN.

## CONSULT & ADVISE

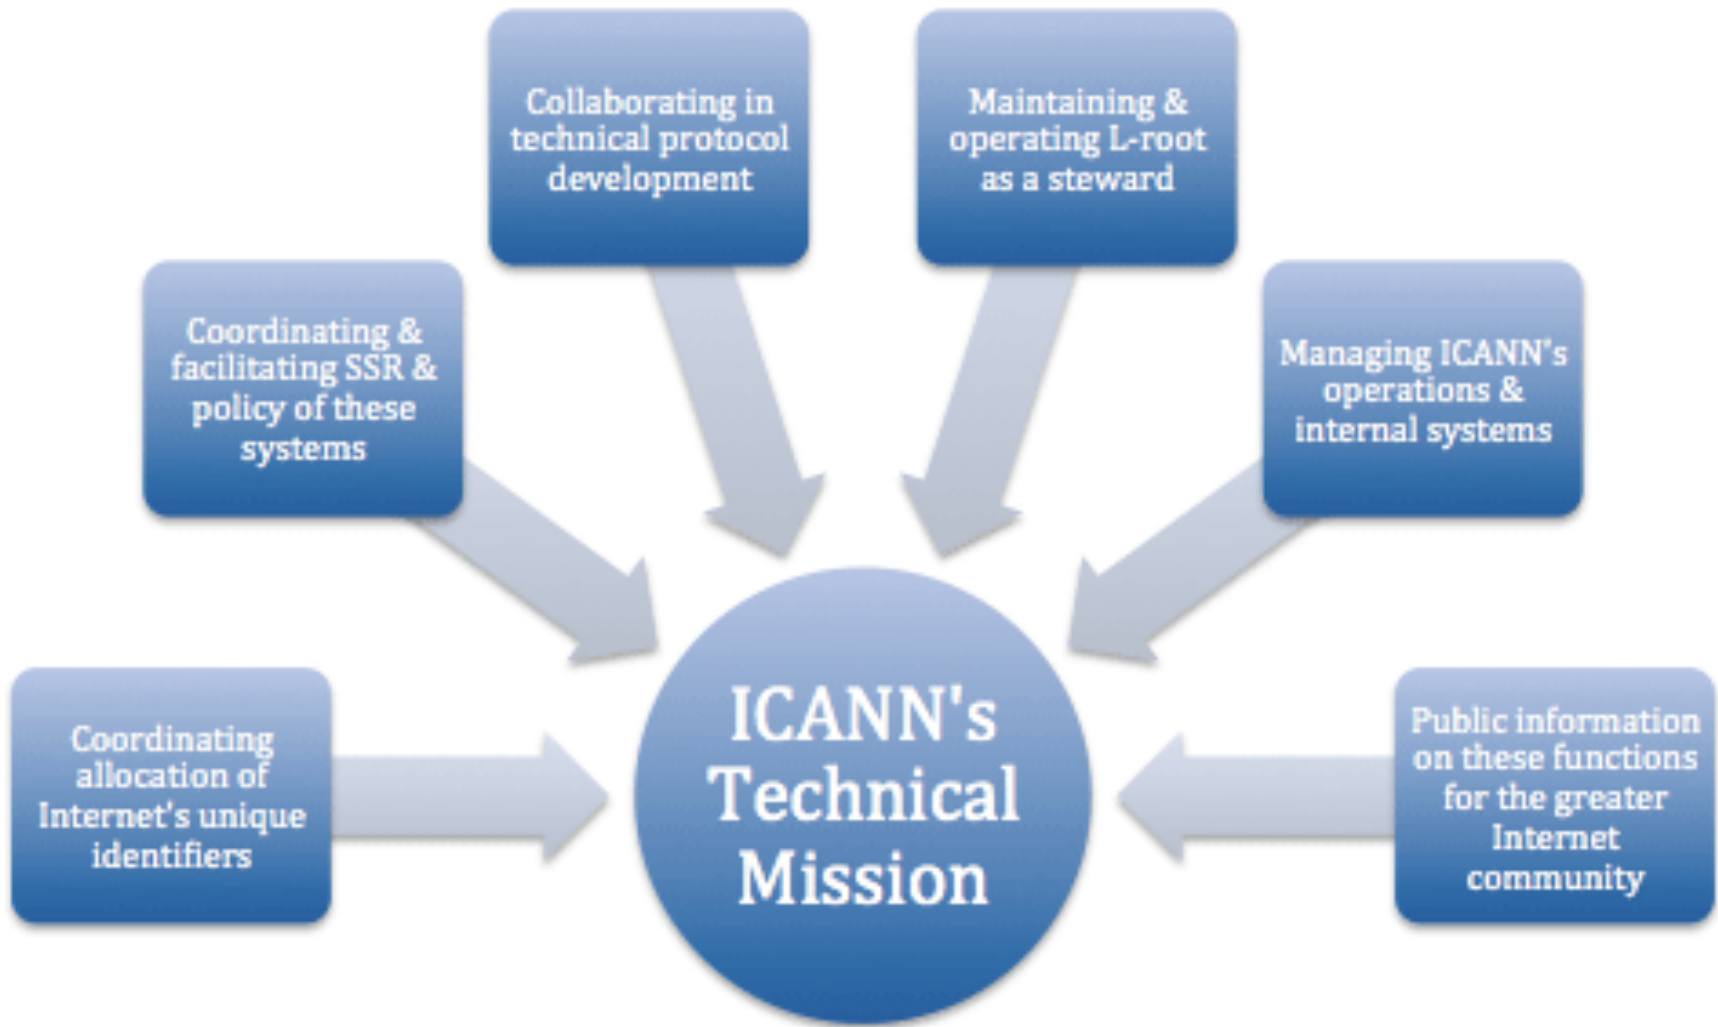

The team contributes to scenarios for global cyber exercises, provides advice on operational practices such as with the root server community and DNS technical community.

## REVIEW & COMMENT

The team regularly provides input into policy development processes, comments on protocols and open standards managed by others in the Internet ecosystem.
