# Multistakeholder Model

# ICANN MULTISTAKEHOLDER MODEL

The ICANN Multistakeholder model of participation is made up of **Supporting Organizations** (SO's - ccNSO, gNSO, ASO) and **Advisory Committees** (AC's - GAC, SSAC, RSSAC, ALAC).

## Supporting Organizations:

[ccNSO](#) is the **Country Code Name Supporting Organisation** / ccNSO where those representing the operation of [ccTLDs](#) participate in the model

[ASO](#) is the **Address Supporting Organization** whose work is built around Internet Protocol (IP)

[NRO](#) is the Name Resource Organization who is the coordinating body for the 5 RIRs

[GNSO](#) is the **Generic Name Supporting Organization** whose work is focused on policy building

- Contracted Parties:
  - <http://www.icannregistrars.org/>
  - <http://www.rysg.info/>
- Non-Contracted Parties: CSG and NCSG
  - [CSG](#) is made up of the Commercial and Business Users Constituency /[CBUC](#) the Internet Service Providers Constituency /[ISPC](#) and the Intellectual Property Constituency ([IPC](#))
  - [NCSG](#) is made up of [NPOC](#) / Not for Profit Organization Concerns and [NCUC](#) / Non Commercial Users Constituency

# ICANN MULTISTAKEHOLDER MODEL: ACs

Advisory Committees / AC

Root Server Advisory Committee / [RSSAC](#)

Security and Stability Advisory  
Committee / [SSAC](#)

Government Advisory Committee / [GAC](#)

At Large Advisory Committee / [ALAC](#)

# THE WORK OF ICANN

## WHAT DOES ICANN DO?

To reach another person on the Internet you have to type an address into your device—a name or a number. That address must be unique, so computers will know where to find each other. ICANN maintains and administers these unique identifiers across the world. Without ICANN's management of this system, known as the Domain Name System (DNS), we wouldn't have a global, scalable Internet where we can find each other.

## Multi-stakeholder Model:

Civil Society & Internet Users, the Private Sector, National & International Organizations, Governments, Research, Academic and Technical Communities are all represented.

## Community-Driven Policy

To keep pace with dynamic technologies and rapid innovation, ICANN enables consensus-driven, Multi-stakeholder policy development, with broad representation from the global Internet community.

## Who's Involved:

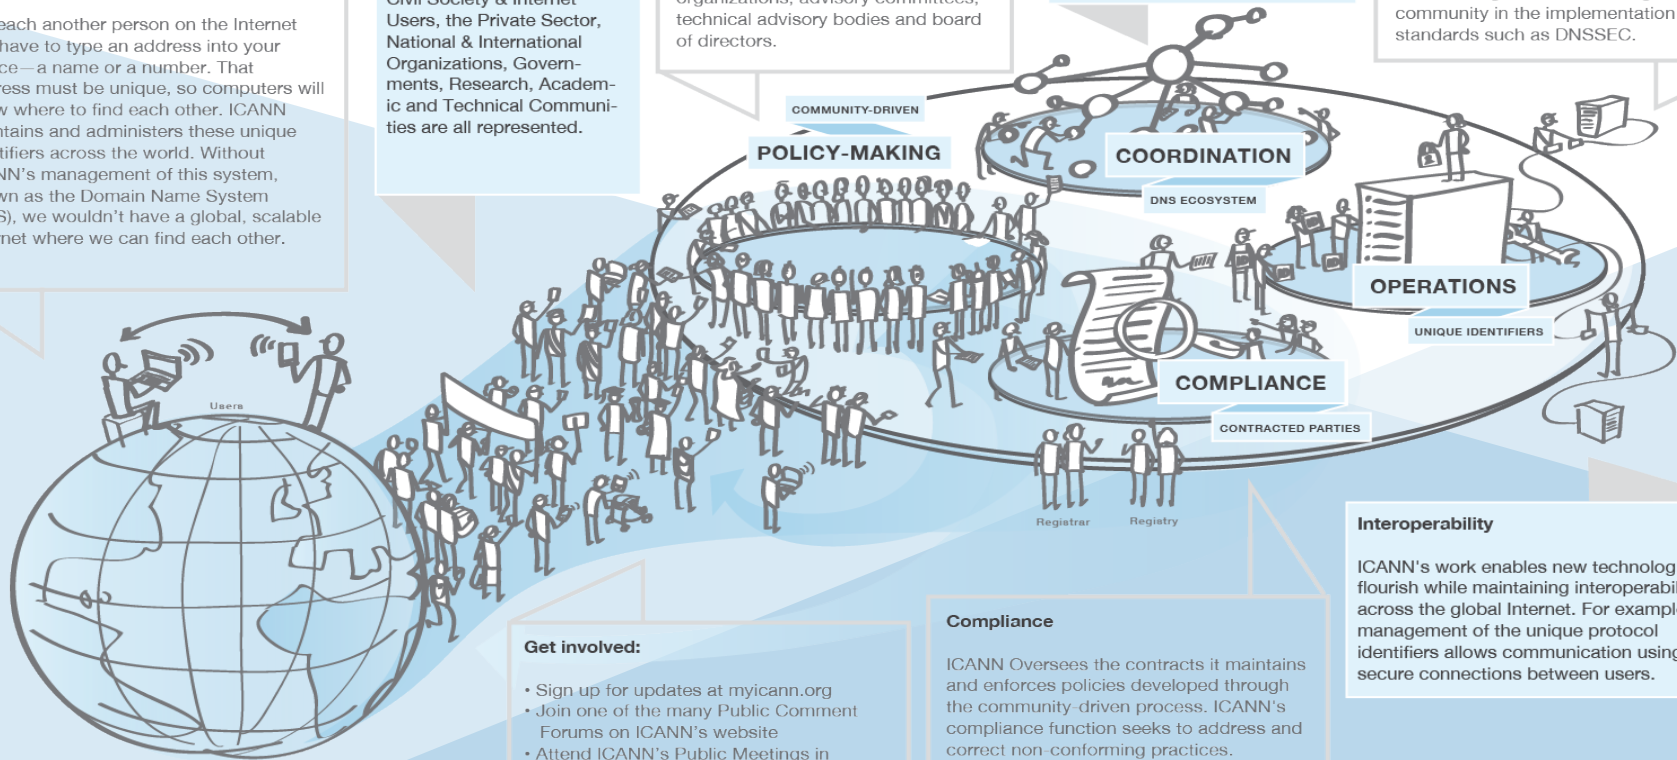

A number of groups: supporting organizations, advisory committees, technical advisory bodies and board of directors.

## Competition & Choice

From accrediting over 1000 registrars, to introducing new Top Level Domains (TLDs), ICANN works to expand consumer choice by fostering competition and innovation in the domain name marketplace.

## Security & Stability

ICANN supports DNS security through technical training and engagement, coordinating and collaborating with the community in the implementation of standards such as DNSSEC.

## Get involved:

- Sign up for updates at [myicann.org](http://myicann.org)
- Join one of the many Public Comment Forums on ICANN's website
- Attend ICANN's Public Meetings in person or online to provide input at a Public Forum
- Join one of ICANN's Supporting Organizations or Advisory Committees

## Compliance

ICANN Oversees the contracts it maintains and enforces policies developed through the community-driven process. ICANN's compliance function seeks to address and correct non-conforming practices.

## Interoperability

ICANN's work enables new technologies to flourish while maintaining interoperability across the global Internet. For example, management of the unique protocol identifiers allows communication using secure connections between users.
